TABLE 1.

Window Title	Window Purpose
SAS:OUTPUT	displays output of statements entered in SAS:PROGRAM EDITOR window, or output from other SAS applications (except high-resolution graphics, and all output from SAS/INSIGHT, which go to other special-purpose windows)
SAS:LOG	displays system/error messages, including start-up messages and messages about the status of programs submitted in the SAS:PROGRAM EDITOR window
SAS:PROGRAM EDITOR	provides full-screen editing environment in which to create, edit, and submit SAS statements (this window is sometimes referred to as the PGM window)
