TABLE 1.

Command	What it does
d	Delete a line of text
dd	Delete a block of text
m	Move a line of text. Once you hit return, you'll be prompted for a new location for the line. Use the line command 'a' or 'b' to mark a location after or before another line.
mm	Moves a block of text
c	Copies a line of text. Use 'a' or 'b' to mark the new location.
cc	Copies a block of text
i	Inserts a line after the current line
ia	Same as i
ib	Inserts a line before the current line
cols	Opens up the display and shows a temporary line which marks the column numbers. To remove this line, use the d line command.
