

The students of Mission 2013  
cordially invite you to their final presentation:

# Can we stop the rapid rise of atmospheric CO<sub>2</sub>?

How we propose to stabilize greenhouse-gas concentrations at an economically viable and internationally acceptable level

Thursday December 3  
@7 PM  
Stata Center 32-123

The class presentation will be followed by questions from the audience and an expert panel

---

Refreshments and reception to follow the question period
