This course applies economic theory and formal models to the understanding of a range of planning-public policy questions that exist in an urban-regional context. An "intermediate" level understanding of economics is a prerequisite. The course requirements include a mid term and final exam, as well as several problem sets.

**COURSE OUTLINE**

I. The structure of Cities: Land Use and Transportation (2/1 – 2/15)
   1. Land markets and land use
   2. Congestion theory, Auto Bottlenecks, public Transportation
   3. Regional Land use planning.
      EXERCISE: 2-mode congestion/investment model (2/15 – 2/25)

II. Urban Labor Markets (2/17 – 3/1)  (no class 2/22)
   1. Job Decentralization and wage variation
   2. Spatial Mismatch in worker-job matching.
   3. Local labor market agglomeration, increasing returns

III. Urban Housing Markets (3/3 – 3/8)   (no class 3/10)
   1. Models of market transactions/friction.
   2. Supply, durable capital, Redevelopment.

IV. Ghettos and the spatial concentration of urban poverty (3/15 – 3/17)
   1. Ghettos and economic outcomes
   2. Spatial Segregation
      EXERCISE: Multiple equilibrium (3/15 – 3/29)

MID TERM (3/29)

V. Local governments, local externalities, land development controls (3/31 – 4/5)
   1. Zoning and land use externalities
   2. Growth controls, extractions

VI. Tiebout, Sorting and Community competition (4/7 – 4/12)
   1. Classical "club" models
   2. Competition within land markets
   3. Empirical tax capitalization
      EXERCISE: locational sorting with public goods (4/7 – 4/14)
VII. Local Public Goods and services: Schooling (4/14 – 4/19) (note class will be held 4/19)
   1. Public versus Private delivery
   2. Institutions and Efficacy: vouchers, performance, contracting...

VIII. Local Public Goods and services: law enforcement (4/21 – 4/26)
   1. Production function issues and policy efficacy
   2. The spatial concentration of crime.
   EXERCISE: public choice with production functions (4/21 – 4/28)

IX. Regional Growth and factor Competition (4/28 – 5/3)
   1. The causes of economic growth, supply versus demand.
   2. Regional convergence, response functions, historical decompositions.

X. Interregional Tax/policy competition (5/5 – 5/10)
   1. Tax and Policy competition models, Nash equilibria.
   2. Industrial development incentives, taxes, investment impacts.
   EXERCISE: a 2-region model with differential taxation (5/5 – 5/12)

XI. Fiscal systems: Federal-state-local 5/12)
   1. Assignment of responsibility issues
   2. Grants, responses, incentives and control

FINAL (week of 5/16)
