

2.20 Marine Hydrodynamics, Fall 2010

Homework Policy

- 1 Homework problems will be assigned after each lecture. *Generally*, homework is due once per week on Thursday. However, because of Holidays and Quizzes there are variations to this rule. The scheduled due dates are given in the course calendar: <http://mit.edu/2.20/www/calendar>
- 2 Graded homework will generally be returned during the lecture 7 days after the due date.
- 3 **No late homework will be graded.**
- 4 Any questions concerning the grading of the homework should be brought to the TA.
- 5 **Students are to work independently, or in reported groups and without special aids that may be considered as an unfair advantage over others unless explicit prior permission is obtained from the instructor or TA.**

Lab Report Policy

Lab reports are to be done on an *individual basis*, though lab work will be done in groups of three. Labs take up 10% of your final grade. There are three components to your overall lab grade:

- *Prelab report.* Prelab reports are meant to encourage thinking through the lab before actually doing the lab. A photocopy of your pre-lab report should be kept, but the original is due at the time you perform your lab. Prelab reports are expected to be only 2 pages long, and will be guided in the pre-lab report assignment, given a week before you perform the lab. It is meant to increase your efficiency in the lab.
- *Lab Report.* This is the final document on your entire lab experience. It will include your prelab report, observations, results and FORMAL analysis/ scientific interpretation of the physical.
