Class 19: Little Languages

6.102 — Software Construction
Spring 2024

Warmup

Look at `examples/RowYourBoat.ts`,
and run it with `npm run RowYourBoat`

- if no sound in Node: `npm run WebServer` instead, and open the URL it prints

You should hear Row Your Boat played twice...
but we want the second time to be *transposed* up one octave in pitch

TODO-1 : implement `transpose` as an **instance method** of `Music` and its variants

- first TODO-1 in `MusicLanguage.ts` line 163, then `Concat.ts`, `Rest.ts`, `Note.ts`

Transpose

`npm run RowYourBoat` or `npm run WebServer`

TODO-1 : implement `transpose` as an **instance method** of `Music` and its variants

- first TODO-1 in `MusicLanguage.ts` line 163, then `Concat.ts`, `Rest.ts`, `Note.ts`

Transpose

`npm run RowYourBoat` or `npm run WebServer`

TODO-1 : implement `transpose` as an **instance method** of `Music` and its variants

- first TODO-1 in `MusicLanguage.ts` line 163, then `Concat.ts`, `Rest.ts`, `Note.ts`

TODO-2 : implement `transpose` as a new **variant class** of Music instead

- you can leave the `transpose` instance method in place — just **don't use it**
- TODO-2 is in `MusicLanguage.ts` line 160 and `Transpose.ts`

Transpose

`npm run RowYourBoat` or `npm run WebServer`

TODO-1 : implement `transpose` as an **instance method** of `Music` and its variants

- first TODO-1 in `MusicLanguage.ts` line 163, then `Concat.ts`, `Rest.ts`, `Note.ts`

TODO-2 : implement `transpose` as a new **variant class** of Music instead

- you can leave the `transpose` instance method in place — just **don't use it**
- TODO-2 is in `MusicLanguage.ts` line 160 and `Transpose.ts`

TODO-3 : implement `transpose` as a **visitor**

- TODO-3 is in `MusicLanguage.ts` line 157 and `TransposeVisitor.ts`
