PROBLEM SET 3

Post date: Thursday, Oct 4 2007

Due date: Thursday, Oct 11 2007

Note: This will be a simple pass/fail problem set.

1. Choose the topic for your class project. Hand in a draft abstract describing what you will do in this project.

Note: *Please* spend some time discussing possible project ideas with Scott! If you haven't yet selected something, you should have some discussion to decide what you are going to do; if you *have* selected something, you should have some discussion to decide what, in detail, you are going to research for your project. Just email Scott to find a time to talk about this.
