CURRENT FUNDED RESEARCH

Toyota Research Institute – North America (TEMA)

2009-present, Project for Reclamation Excellence (P-REX) at Massachusetts Institute of Technology, Project Leader: Alan Berger

The focus of this research is to establish new infrastructural locations based on movement trending in and out of Principal US urban areas, and new BoomTowns, and to collaborate with Toyota on appropriate new mobility methods for prototyping.

Provincia Di Latina, Italy –Wetland Machine and Systemic Design

2007-present, Project for Reclamation Excellence (P-REX) at Massachusetts Institute of Technology, Project Leader: Alan Berger

In cooperation with the European Union LIFE+2009 Program, Provincia Di Latina: Dottore Carlo Perotto-Dirigente Settore Pianificazione Urbanistica e Territoriale; Dottore Nicoletta Valle- Dirigente Settore Ecologia e Ambiente. *This project extends Alan Berger's research at The American Academy in Rome on the Pontine Marsh region of Latina, Italy. Work includes urban planning, landscape architecture, environmental analysis, and feasibility and engineering study for a new constructed wetland to treat urban and agricultural effluent in the Latina's Bonifica Integrale. Design development to be completed in 2009, construction 2010.*

Wellington Oro Reclamation and Urban Design Concept Booklet and Plan: EPA Reclamation Publication Series

In cooperation with U.S. Environmental Protection Agency, Region 8 Superfund Office Consulting Project, 2005-Present

Project for Reclamation Excellence (P-REX) at Massachusetts Institute of Technology
Project Leader: Alan Berger

Project Consultant: Victor Ketellapper, USEPA Region 8, Superfund Program, Town of Breckenridge, Summit County, PoplarHouse Developers, 2x4, Inc.

Our Networked Nation: Transformation of the American Economic Landscape

InterFaculty Research Project, 2005-Present

Co-authors: Alan Berger (MIT), Edward L. Glaeser (economist, Harvard KSG), Richard J. Zeckhauser (economist, Harvard KSG)

This project explores the history and construction of infrastructures of mobility, communication, and exchange that have realigned patterns of urbanization across North America.

Superfund Sites and Abandoned Mine Reclamation Planning and Design

U.S. Environmental Protection Agency, Region 8 Superfund Office

Research Project, 2004-Present

Project for Reclamation Excellence (P-REX) at Massachusetts Institute of Technology

Principal Investigator and Project Leader

This study applies landscape planning and design concepts to reclaim mining sites, and develops a guide for integrating brown-scape design concepts with mine reclamation. Sites vary as Government action is required.
