First-year students intending to major in Course 16 are urged to carefully plan their Spring course load to ensure they complete the prerequisites for Unified Engineering 16.001-002. The course load of 57 units allowed for first-years may not be suitable for all students.

Course 16 majors are required to complete 192-198 units beyond the GIRS. The following roadmap shows the paths typically taken by students who enter Course 16 in the Fall term of the sophomore year and later enroll in the 16.82x or 16.83x lab/capstone sequences. Students who wish to complete an option in aerospace information technology will follow the same paths, but they must take at least three (36 units) of the four (48 units) required professional subjects in subjects other than 16.100, 16.20, 16.50, or 16.90. Several other options are available in the Course 16 lab/capstone and professional area subjects. Please check the MIT Course Catalogue (http://student.mit.edu/catalog/index.cgi).

This roadmap assumes that all non-HASS GIRs are taken in the first year. That does not need to be the case; for example, the Biology GIR can be delayed to the junior or senior year and the Chemistry GIR - co-requisite for Unified Engineering Thermo - can be taken in the sophomore year. Also note that Physics II GIR (co-requisite for Unified Signals) and 18.03 Differential Equations (co-requisite for Unified Structures and Unified Signals) can be taken in the sophomore year. However, a student must complete Calculus I-II and Physics I before they can enroll in Unified Structures and/or Unified Signals.

Students must discuss their individual course plan with their academic advisor and consult the current MIT Course Catalogue (http://student.mit.edu/catalog/index.cgi) for up-to-date information on degree requirements, course prerequisites, and the terms in which courses are offered. Also check the Course 16 Calendar for Experimental and Capstone Subjects.

18.02-Calculus II (12)            CALC
18.03-Differential Equations (12) REST
HASS (9), CI-H                  HASS
Term Units = 57

2. Sophomore Year

Fall Term

16.001-Unified Engineering I (12) REST
16.002-Unified Engineering II (12) 12
6.0001 Intro to Computer Programming in Python (6) and
6.0002 Intro to Computational Thinking & Data Sc. (6) or
6.00 Intro to Computer Science and Programming (12) 12
HASS (12), CI-H                  HASS
Term Units = 48

Spring Term

16.003- Unified Engineering III (12) 12
16.004-Unified Engineering IV (12) 12
16.09 Statistics & Probability (12) or
6.041A-6.041B Intro to Probability I-II (12) 12
HASS-A (12)                      HASS-D
Term Units = 48

3. Junior Year

Fall Term

16.06- Principles of Automatic Control (12) 12
16.07- Dynamics (12)                        12
16.100 Aerodynamics (12), PAS               12
HASS (12)                                    HASS
Term Units = 48

Independent Activities Period
A six-unit elective, e.g. UROP-for-credit 6

Spring Term

16.20 Structural Mechanics (12), PAS        12
16.821 Flight Vehicle Development (18), LAB, CI-M or
16.831J Space Sys Development (18), LAB, CI-M LAB 6
16.90 Computational Modeling & Data Analysis 12), PAS 12
HASS-H (12)                                  HASS-D
Term Units = 54
4. Senior Year

Fall Term
16.400 Human Systems Engineering (12) 12
16.82 Flight Vehicle Engineering (12), CI-M
or
16.83J Space Systems Engineering (12), CI-M 12
Elective (12) 12
HASS-S (12) 12
Elective (6) 6
**Term Units = 54**

Spring Term
16.50 Aerospace Propulsion (12), PAS 12
Elective (12) 12
Elective (6) 6
HASS (12) 12
**Term Units = 42**

**TOTAL UNITS BEYOND GIRS = 198**

---

Notes:

1. The two Institute REST requirements (24 units) can be satisfied from among 6.0001-6.0002 or 6.00, 18.03 or 18.034, and 16.001. The Institute Lab requirement (12 units) for students choosing this roadmap is fulfilled through 16.821 or 16.831, each of which carries 18 units. Units from departmental subjects that fulfill the REST and Lab requirements do not count in units beyond GIRS. However, six of the 18 units in 16.821 or 16.831 do count in units beyond GIRS.) Students must fill the 36-unit gap in their departmental program by taking additional electives.

2. A student interested in taking capstone 16.82 or 16.83 must complete a minimum of two professional area subjects before enrolling in either capstone. With instructor permission, they are however allowed to take 16.821 or 16.831 before taking 16.82 or 16.83.

3. Students take a minimum of four professional subjects (48 units) in three different areas. As mentioned earlier, students interested in doing the option in aerospace information technology also take 48 units, 36 of which must come from subjects other than 16.100, 16.20, 16.50, 16.90. This IT option is not reflected on a student’s transcript or diploma.
