

MIT Alumni Association

In the year after MIT150 celebrations, the [MIT Alumni Association](#) sustained its engagement of alumni and attained exceptional donations. The MIT Annual Fund reached record levels in both Tech Reunions giving and annual giving. Association events increased 17% with strong attendance numbers, as 33,776 attendees went to 1,045 events worldwide.

The Association also made progress on deepening alumni engagement measured by the concept of mindshare, which is defined as engaging alumni in three ways: face-to-face, through philanthropic donations, and through online interactions. Half of all alumni are engaged in at least one of those ways and the Association increased the number engaged from 13.9% to 14.8%, which reflects an increase of 6%.

The Association works to strengthen connections among MIT's 126,684 alumni and enhance their ties to the Institute. A majority of alumni live in the US; 15% live abroad in 162 other countries. Approximately 51% hold graduate degrees exclusively, 49% earned an MIT undergraduate degree, and 24% of those with undergraduate degrees also earned graduate degrees at MIT. In total, 75% of alumni hold graduate degrees. The alumni body is 21% female. Across all schools 48% earned degrees in engineering, 21% earned degrees in science, 17% earned degrees in management, 6% earned degrees in architecture, 5% earned degrees in humanities and social science, and 3% earned degrees in other areas.

Key Accomplishments

- The MIT Annual Fund recorded donations of nearly \$50.3 million with increases to unrestricted giving up by 8%.
- Volunteers continue to power the Association and all its activities. This year 12,193 volunteers worked on behalf of MIT and the Association including 10,913 alumni.
- The Association continued to increase its use of social media to build connections to and among alumni. Fueled by interest in our MIT-Cornell Fictional Alumni Face-Off, Facebook use was up 45%, Twitter use rose 39%, and LinkedIn 30%.
- The Association's website drew more than 3.5 million page views, with a 257% leap in those who visited the site through mobile devices.
- The William Barton Rogers Society, which recognizes leadership gifts of \$1,000 or more, grew by 12% while the 1861 Circle, a society of loyal donors who have given five or more consecutive years, posted a 3% increase.
- The MIT Parents Fund set a new record with more than \$1.7 million in gifts.
- Alumni education programs totaled 180 programs, a 37% rise, because of an increase in Faculty Forum Online interview webcasts, partnerships with school development officers to encourage faculty presentations to alumni worldwide, and MIT clubs tapping local alumni experts as speakers.

- The Student/Alumni Externship Program set a new record with 294 student participants working with alumni around the world.
- The Class of 2012 shattered the participation record for its Senior Gift Campaign with a new all-time high of 80.4% participation.
- 493 alumni and friends participated in an MIT Alumni Travel Program trip. This was a 17% increase over last year and included 238 new travelers.
- At 36% undergraduate participation, MIT placed third within the IvyPlus cohort for participation in FY2011, according to the most recent data. Princeton University and Dartmouth University reported a higher participation rate than MIT, but MIT tied with Stanford University.

Annual Giving

The MIT Annual Fund exceeded its goal of \$49.5 million with gifts of nearly \$50.3 million. The goal for donors was an aspirational 41,350 donors—an expression of the MIT Annual Fund Board’s desire to maintain the momentum generated through MIT150. The Fund stayed on pace with that vision and came very close to the target, reporting final results of 41,069 donors.

The overall alumni participation goal of 29% was met, although the undergraduate participation rate dipped slightly from 36% to 35%. The graduate alumni goal of 22.5% participation was achieved.

In other highlights, the Parents Fund, led by John Begg ‘78, P ‘10, P ‘14 raised \$1,703,000 relative to last year’s result of nearly \$1.6 million. There also were more non-alumni parent donors participating in the Parents Fund in FY2012, up from 3,034 to 3,270. This speaks to the impact of broader efforts across all advancement units to further engage this important constituency.

This year, 3,547 donors contributed to endowed scholarship funds and 1,400 donors gave to expendable scholarships for total scholarship support of \$5,175,095.

The 2012 Reunion Gift Campaigns set a new collective record, largely due to the Class of 1962 record-breaking 50th reunion gift of \$201,958,170. Doug Bailey ‘72, SM ‘74, ME ‘75, the MIT Annual Fund board chair, presented a comprehensive reunion gift to the president totaling \$258,115,632, which represents five years of giving by major reunion classes.

The William Barton Rogers Society grew again in FY2012, reporting 6,414 members, compared to 5,738 in FY2011. As the society matures, it helps to build a pipeline of donors who may eventually be positioned to consider a major gift to MIT.

The 1861 Circle completed its third full year honoring MIT’s most loyal donors—those who have given each year for five or more years. As anticipated, the loyalty factor continues to climb. In FY2012 a remarkable 17,167 donors were recognized as members within this society, compared to 16,666 in FY2011.

Another growth area is engagement of friends of MIT. While there was a surge in giving from friends in FY2011, which was largely attributed to the MIT150 celebration, the Association was pleasantly surprised not only to renew more than 1,300 past friends as donors, but also to add over 900 more donors to that category. This brought the total of friend donors through this fiscal year to 2,286, up nearly 14% from FY2011.

Every donor makes an important contribution to upholding MIT's ability to provide the best education in contemporary fields and address the world's large-scale problems.

Events

Face-to-face events are a vital way for the Alumni Association to build community and connection. In addition to Tech Reunions and club, class, and other group events, the Association hosts Family Weekend and the Alumni Leadership Conference.

The Association's work on MIT150 events, which included hosting and supporting 164 gatherings on campus and worldwide, was honored with a Silver Medal award from the Council for Advancement and Support of Education (CASE).

Tech Reunions

Attendance at Tech Reunions 2012, held June 7–10, was the second highest on record, with 3,529 alumni and guests attending some 156 events. Alumni hailed from 45 states and 24 countries. Approximately 330 volunteers helped with the festivities. Highlights follow:

- Tech Reunions offered four days of celebrations that included the classic Tech Night at Pops, a spirited dance party at Toast to Tech, a tribute to president Susan Hockfield, thought-provoking lectures, and delicious meals.
- For Tech Night at Pops, Marcus Thompson, the Robert R. Taylor professor of music, joined the Boston Pops and conductor Keith Lockhart onstage to perform a solo on Gustav Holst's *Lyric Movement* for viola and chamber orchestra.
- Toast to Tech 2012, a complimentary late-night beer and wine reception open to all reunion attendees drew a crowd of 900 people to North Court for cross-generational camaraderie and festivities.
- Members of the Cardinal and Gray Society—those who have celebrated 50 reunions or more—heard talks from professor Woodie Flowers SM '68, ME '71, PhD '73 and MIT AgeLab Director Joe Coughlin and capped their weekend with the Cardinal and Gray Dinner Dance.
- The reunions team worked with a vendor to create a software application that would run on iPhones, iPads, and Android phones. The FY2012 app was downloaded by 437 users who clicked on more than 19,101 pages.

A tribute to President Hockfield kicked off Tech Day, with Association leaders presenting her with two gifts: a photo memory book and a pin in the shape of a basal ganglion (her area of research) fashioned from a brass rat ring. Members of the audience offered

the president, who planned to step down July 1, a garden of flower fans, which symbolized the president's depiction of herself as a gardener caring for the many flowers of innovation on campus.

Technology Day, which sold out Kresge Auditorium with 1,279 registrants, was titled American Transformations: The Next Industrial Revolution. Olivier de Weck SM '99, PhD '01, associate professor of aeronautics and astronautics, outlined the findings of a forthcoming Production in the Innovation Economy report that examined the state of manufacturing in the United States. He noted that although US manufacturing has declined in terms of employment, it continues to be the world's leading innovator.

Other speakers included professor Kristala Jones Prather '94, whose research focuses on developing biosynthetic routes to chemical compounds of interest, such as fuels and bulk specialty chemicals. She discussed bio-based products that can be grown throughout the United States. Professor Markus Buehler discussed materials by design. His research pulls apart substances at the molecular level—like super-strong spider silk—to understand the building blocks and then fashion new materials. Marcie Black '94, MNG '95, PhD '03 and Nate Ball '05, SM '07 offered their real-world experience of advanced manufacturing. MIT researcher Brian Anthony SM '98, PhD '06 moderated a question and answer session.

During the Technology Day Luncheon, the Alumni Association announced its newest honorary members: Edmund W. Bertschinger, professor of physics and head of the Department of Physics; Daniel T. Langdale, former financial aid and admissions administrator; and Jane Pappalardo, a member of both the Council for the Arts at MIT and the Visiting Committee for Music and Theatre Arts.

Special programming brought more than 150 graduate-degree-only alumni and their guests back to campus during Tech Reunions. Program highlights included a lunch with the Ashdown housemaster, a Thirsty Ear Pub reunion with special screening of *PhD, The Movie*, and a graduate poster symposium and barbeque in Walker Memorial.

Education Programs

Faculty Forum Online reached a significant alumni audience with 3,630 registrants for the eight events, plus 9,301 visits to online archives. These 30-minute interviews with faculty include questions submitted live from logged-in alumni and provide an extraordinary opportunity for alumni worldwide to engage directly with faculty members.

In partnership with swissnex Boston, which promotes knowledge exchange between Switzerland and host regions, Alumni Education presented an event featuring professor Sebastian Seung and Swiss researcher Benjamin Bollmann to discuss Seung's new book, *Connectome: How the Brain's Wiring Makes Us Who We Are*. Bollmann, a visiting scientist at MIT, created the book's photographic images. This was the most well-attended educational event in this area in several years and drew 234 registrants, including 131 MIT alumni.

The View from the Top visited a new city, Houston. Under the theme of Exploration: New Frontiers in a New Era, four members of the local alumni community discussed their work. Gene Norman '82, chief meteorologist at KHOU-TV, moderated the evening featuring Franklin Chang Diaz ScD '77, founder, chairman, and CEO of AdAstra Rocket Company; Lawrence Dickerson P '11, president and CEO of Diamond Offshore Drilling Company; and Roberta Kowalishin SM '94, CIO of the *Houston Chronicle* and vice president of Web Technology for Hearst Newspapers.

The record number of education programs—180 versus 133 for FY2011—included 80 alumni and 71 faculty presenters. The increase in alumni speakers strengthens awareness of the MIT network and pride in being a member of it. Some 9,269 alumni and 3,452 friends registered for Alumni Education events in FY2012.

Other Gatherings

In her final year as MIT president, Susan Hockfield spoke at a total of seven club events, five domestic and two international. She visited MIT clubs in Boston, Greenwich, Princeton, San Diego, and southern California, as well as in Rome, Italy. She celebrated the MIT Association of Japan's 100th anniversary in Tokyo.

Family Weekend brought 608 families, or 1,898 individuals, to campus.

Summer Send-Off Events—club events held to send off newly enrolled MIT students—totaled 44. These programs bring together all elements of the regional MIT community.

Toast to IAP, an annual program that invites MIT10 alumni to cocktail receptions on the same January night, totaled 64 events worldwide in FY2012—nine more than the previous year, which celebrated the MIT150.

The affinity groups of AMITA (women alumni) and BAMIT (black alumni) each held five events in FY2012. BGALA (Bisexual, Gay, and Lesbian Alumni) held a successful, first-of-its-kind event, Escape to the Cape in Provincetown, on July 30.

Travel

This year, 12 MIT Alumni Travel Program trips were led by faculty, including a turbo-prop tour of New Zealand, observations at the Keck Observatory in Hawaii, summiting Kilimanjaro, exploring Patagonia, and learning about hurricanes in the Caribbean.

Local alumni met with travelers at 10 locations this year including Oslo, Delft, Wellington, Beijing, Shanghai, Istanbul, Cape Town, Johannesburg, and Rabat. In addition, alumni travelers, faculty leader John Dobson '62, and local alumni met with US ambassador to Egypt Anne Patterson and her husband David Patterson '64 at a reception in Cairo.

The annual trip catalogue, *2010 MIT Explorer Catalogue*, won an honorable mention award in Special Purpose Print Communications in the 2011 CASE District 1 Communication Awards.

Engagement/Advocacy

Alumni are MIT's best ambassadors in their workplaces and communities. The Association provides opportunities to get involved in interest groups, interview prospective students, and share stories that illustrate MIT's mission in the world.

A defining project for many Association staff members was the migration to the new online community platform, Encompass, a project that aims to increase engagement by improving club and group services, including website, email marketing, and management of events, membership, and data. The club staff started training on the software in May 2011 and migration of beta groups began in January 2012. By the end of the fiscal year, 40% of clubs had migrated to the new platform. Other staff members in Alumni Relations, Information Systems and Services (IS&S), and Communications worked on technical aspects, training, and communications throughout the year.

An Infinite Connection Refresh campaign, the title for the Encompass communications and outreach plan, involved giveaways, email messaging, and in-person presentations to reach nearly 300 Alumni Association and Resource Development staff on the new features and hundreds of alumni volunteers. Efforts included two well-attended sessions at the fall Alumni Leadership Conference, plus campus training in June for key volunteers. Sloan, in a new partnership, will migrate up to six alumni clubs to the new system.

Because of reductions in travel budgets, club staff relied on Skype and WebEx to train volunteers online and worked with the Alumni Online Services team to build an online toolkit for staff and volunteers.

The Institute Career Assistance Network continues to thrive with more than 4,200 members who share job advice with students and alumni. More than 660 jobs were posted on the exclusive MIT job board. There were two live webcasts focusing on career guidance—one on IT consulting, the other on life sciences consulting with more than 650 registrations combined. Three webcasts are planned for FY2013.

Special Interest Networks

The Association's K-12 STEM Education Working Group expanded its work with FIRST (For Inspiration and Recognition of Science and Technology). The MIT Club of Boston had an especially successful event with over 300 attendees at the Boston regional FIRST competition. The event featured pit tours and a talk on K-12 STEM and Scratch software by professor Mitch Resnick SM '88 PhD '92 from the Media Lab's Lifelong Kindergarten program. This year at the championships in Kansas City, MO, an event for admitted students and alumni attracted approximately 175 people who gathered to connect and to hear from dean of admissions Stu Schmill '86 and director of the Lemelson-MIT program Josh Schuler SM '00. On the Association's website, the K-12 STEM Education Network now has 651 members—a 90% increase over last year.

The K-12 STEM Education Working group also worked closely with the MIT Science and Engineering Program for Teachers, hosting a webinar on the program. Thirty teachers were sponsored for the program by 16 participating clubs.

Thirty-two teachers were selected as MIT Inspirational Teachers out of 57 nominations, including one who was nominated by three undergraduate students from Nepal.

Energy, Environment, and Sustainability Network leaders include Doug Spreng '65, a veteran of the high-tech industry, who is heading up the group of energy ambassadors helping to connect the MIT Energy Initiative to the alumni population. They reach out to the 1,397 MIT alumni who have identified their energy interests and expertise. The on-line community has grown exponentially, increasing 65% since last year.

The new Legislative Advocacy Network aims to educate and empower interested MIT alumni to contact their legislators in support of public policy issues important to MIT, the science and technology community, and the broader society. A session at the Alumni Leadership Conference gathered a beta group of volunteers and now 233 alumni have registered to take part. A June webinar explaining current federal budgeting and sequestration attracted 65 attendees. The Association hopes to send out its first call to action for contact to legislators in the summer of 2012.

Student Engagement

- The Alan '73 and Terri Spoon Community Catalyst Leadership Program celebrated its fifth anniversary with 38 junior students starting in fall 2011. In a pilot program, 13 sophomores began the previous spring. Thirty-four alumni and two staff served as coaches.
- The Student/Alumni Externship Program set a new record with 294 externs around the world. An information session, videotaped for students, was viewed more than 2,000 times. Eighteen Slice of MIT blog posts were published from students and sponsors. Five externship grants were awarded totaling \$2,500.
- Working with the senior class president, the Association sponsored programs during Senior Week included a highly successful Toast to 2012 reception with President Hockfield and the annual Move Out Scoop Out. More than 300 students attended each event.
- To encourage students to use the Association's Infinite Connection website and associated services, students were invited to register for a new account or log in to enter a raffle to win prizes including a Kindle Fire, iPod shuffle and Tech Cash gift card. More than 1,200 students participated.

Communications

The Association was awarded gold from the CASE Circle of Excellence in the best uses of social media category for its MIT-Cornell Fictional Alumni Face-Off entry. The main goal was to increase engagement and measure it. The Association found that people participated at a much higher rate than they do on Slice of MIT, the Alumni Association blog. Other offices (News Office, alumni clubs, and classes) often retweeted mentions of the contest, which boosted participation. The contest even created community by spawning a joint MIT-Cornell alumni club gathering in Beijing.

Slice of MIT celebrated its one-millionth page view in June. A [list](#) was created to point out the most popular posts since its founding in 2009. The ten most popular posts follow:

- [“‘Smoot’ Enters the Dictionary”](#) (6,170 views)
- [“What’s It Like To Be 75 Years Old? Try This On”](#) (8,304 views)
- [“Richard Feynman: Still Lively on Scribd”](#) (8,847 views)
- [“No. 1: MIT Ranks at the Top”](#) (10,386 views)
- [“Staying Healthy Thanks to MIT Medical”](#) (13,582 views)
- [“Gen. Petraeus Commissions His Son and 11 Other ‘09 Graduates”](#) (14,787 views)
- [“1948 Mayor to MIT: Use Flamethrowers to Melt Snow?”](#) (28,151 views)
- [“Slice of MIT...Anyone Have a Slice of Cheese?”](#) (34,134 views)
- [“Renewable Energy: Paper Tiger or Green Giant?”](#) (44,587 views)
- [“Hmmm Chocolate....Science”](#) (67,443 views)

Thanks to outreach and advertising, social media engagement has grown substantially.

- [Facebook](#): 10,273 fans (up 45%)
- [Twitter](#): 7,772 followers (up 39%)
- [LinkedIn](#): 20,023 members verified (up 30%)
- [Slice of MIT](#): 359,715 views (down 5%)

The K-12 STEM Education Facebook page is extremely active, with 1,055 likes and a team of alumni volunteers who work to post and keep the page up to date. The K-12 STEM Twitter account also has 884 followers.

The Association edits *Technology Review’s* Alumni Connection pages in the MIT News section and publishes 36 alumni profiles in the Class Notes/Course News areas. These profiles are popular on the Association website as well.

Activity in the Association’s Infinite Connection website, which contains the online alumni directory and access to many services, grew by 4% in terms of increased logins by alumni, students, and others. The website received 3.55 million page views from 597,647 visitors. On average, the website draws nearly 50,000 unique visitors each month. Mobile use grew 257% with 32,394 visits.

The Association uses an array of e-newsletters to deliver news and useful information in a timely way. *Tech Connection*, the monthly email newsletter for all alumni, covers research, Institute news, and campus culture. *Volunteer View*, the e-newsletter for alumni who work with their classes and clubs or as educational counselors, provides tips for effective community building and connects the volunteer community. A regional monthly e-newsletter sent in conjunction with the MIT Club of Boston updates local alumni about club and campus events.

Volunteering

Volunteers continue to power the Association and all its activities. Every club and class activity, every interest and affinity group, every mentor and externship opportunity is possible because of the countless hours alumni and friends devote to MIT. Volunteer numbers are as follows: 12,193 volunteers worked on behalf of MIT and the Association; 10,913 are alumni volunteers; 1,280 are not alumni (but include parents, corporation members, and others); 16% are international; and 44% are donors.

Approximately 28% of the volunteers are women versus the total alumni proportion of 21%. Forty-four percent of volunteers are also donors, compared to the overall alumni participation rate of 29%. About 15% are international, mirroring the proportion of the total alumni body.

The annual Alumni Leadership Conference brought more than 530 key volunteers and friends to campus in the fall to share their expertise, get a fresh MIT experience, and hear from MIT leaders and faculty. This year's theme, Building Community: Next-Generation Networks addressed the crucial roles volunteers play in sustaining and enhancing the Institute. The conference's agenda included MIT's growing international role, social media marketing, fundraising strategies, and recruiting volunteers.

Annual awards recognize the enormous contributions volunteers make to MIT and the Association. The winners of the Bronze Beaver, the Association's highest award to exceptional volunteers, went to Douglas G. Bailey '72, SM '74, ME '75; Charles W. Johnson BE '55; and Philip C. Kwok '61. See the appendix for all the FY2012 award winners.

Some 3,000 alumni served as educational counselors worldwide, interviewing prospective students, recruiting, and serving as resources in their communities. See a list of volunteers by [name](#) and by [role](#).

Governance and Infrastructure

Gregory Turner '74, MArch '77 served as president during FY2012. Turner, a Houston architect and a longtime volunteer for the Association, his class, the MIT Corporation Development Committee, and the Club of South Texas, focused on issues of governance and alumni engagement in propagating MIT's message. He led the board of directors in exploring the future role and strategy of the Association. At the end of Turner's term in June, the board voted to accept the two reports—one creating a committee to assess Association activities and the other offering suggestions for changes to internal board operations.

Turner presented the gavel to incoming president Chiquita White '85 at the Technology Day luncheon. White, who began volunteering immediately after her graduation, has served as president of the Black Alumni of MIT (BAMIT), on the board of directors, and on the MIT Corporation and its executive committee.

The newly named president elect is John W. Jarve '78 SM '79, a venture capital professional and a key volunteer in the Northern California region. He has served on the Alumni Association Board of Directors, the MIT Corporation, and his work was recognized with the Lobdell Award in 1991 and then the Bronze Beaver in 1998. He expects to take office July 1, 2013.

The MIT Corporation elected the following three alumni nominees as term members during its quarterly meeting in June:

- Mark P. Gorenberg '76, partner, Hummer Winblad Venture Partners
- Paul R. Marcus '81, managing director, Marcus Partners
- R. Gregory Turner '74, MArch '77, partner and president, Turner Duran Architects

The Association and its Committee on Nominations to Corporation Visiting Committees solicited nominations, reviewed recommendations with department heads, researched and compiled materials for the more than 400 alumni being considered for positions on the 31 visiting committees.

The Association works with the MIT Corporation on the annual ballot for the selection of a Recent Graduate Member of the Corporation. Tanguy Chau SM '10, PhD '10, MBA '11 was selected by fellow recent graduates and appointed by the MIT Corporation.

Alumni elected to three-year terms on the Alumni Association Selection Committee for FY2013 are Maroula S. Bratakos '93, Cristina Dolan SM '94, Julian P. Lee '97, and William W. Reenstra '72.

Infrastructure

Migrating to iModules Encompass, a third-party web services platform, has been the signature project of the year. To date, 32 clubs, 27 classes, and one affinity group have launched; migration is expected to conclude during the fall of 2012. Two hundred groups will migrate to the new system, which is expected to handle about 70% of the Association's online services. Staff efforts included development of specific features, training of staff and volunteers, and executing a communications plan. This Association-wide effort has involved a significant learning curve for both staff and volunteers.

Migration to AdvanceWeb, the web user interface for the Association database of record, began this year with software and server upgrades, training on new report systems, and other developments.

Other IS&S efforts include upgrades to the giving website including creating an online tax receipt, security enhancements, and increased efforts to capture additional student activity data.

Through continuing hard work to update the alumni database, the Association has contact information for 95 percent of alumni, an extraordinarily high number when compared to peer institutions.

Budget Summary and Personnel Update

In FY2012, the Association's total expense budget was \$10,660,497. The Institute provided general budget funds of \$10,320,560 for Association programs, which included \$1,619,709 allocated for subscriptions to *Technology Review* magazine. The budget was balanced with \$115,000 from the Association's reserves and \$224,937 from program revenues. The Association closed the 2012 fiscal year with a surplus of \$107,225, which was returned to the reserves.

The Association's total headcount at the end of FY2012 was 76, compared to 79 at the end of FY2011. This reduction reflects the three staff members associated with the Enterprise Forum transitioning to *Technology Review*. The Association had six new hires and three promotions. Also, there were five Infinite Mile recipients and 24 Spot Award recipients.
