ASA SPACE ALLOCATIONS - 2011 CATEGORIZATIONS

### Information for categorizations of groups with current space

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Expect to stay in same space; sharing may change for currently shared spaces (in a way that doesn't impact amount of space for current occupants in this category)</td>
</tr>
<tr>
<td>B</td>
<td>Expect to keep same amount of space (not necessarily, but possibly, same location)</td>
</tr>
<tr>
<td>C</td>
<td>Amount of space may decrease (different space, sharing a currently unshared space, additional roommates)</td>
</tr>
<tr>
<td>D</td>
<td>Expect amount of space to decrease, groups in this category are then put into the WXYZ categories</td>
</tr>
</tbody>
</table>

New/additional requests for these groups are in the WXYZ categories

#### Office Overall Notes:

B as compared to A: groups are categorized as B instead of A if application lacked substantial reasoning for why that specific space is particularly important (as compared to the same amount of space)

A/B + sharing may change: for currently shared spaces, amount of space allocated to groups with A's and B's expected to stay roughly the same (compared to allocated %'s given by groups), but the number of or the specific occupants may change

C + may share: for currently unshared spaces, space may be shared which would mean some decrease in amount of space

#### Locker Overall Notes:

B as compared to A: lockers may be rearranged within a space or a group may move between locker locations

Highlighted groups: conditional on showing the ASA the interior of your locked locker(s)

### Information for categorizations of new and additional requests

Definition of categories: for a specific type of space, the expectation is that groups in W will get space before groups in X and so on.

#### Overall Notes

Lockers - X compared to W: generally because application does not give substantive details about what will be stored. For full compared to half: may also be that explained usage could fit in a half locker.

Lockers - X compared to W: generally because application does not give substantive details about what will be stored. For full compared

Especially for new/additional office space requests, availability and other demand for applicable spaces was considered in addition to the content of the request.

**Notes**

1. Darkroom areas: longer term discussion about combining/condensing darkroom and similar work spaces. No changes expect in January assignments. Expect ongoing discussions during Spring 2012 with a decision about assignments and/or further timeline to be decided before May 2012 ASA Board transition.
