Tracks in the Biology Major

Starting in 2007-2008, students will have the option of pursuing a specific "Track" within the Biology major. In some cases, these Tracks recommend a set of non-Biology courses that provide breadth and depth in the indicated topic. In other cases, the Tracks provide guidance in how to focus on a specific sub-discipline of Biology. A student can switch between Tracks, or devise his/her own degree program.

In addition to recommended Depth/Breadth courses, each Track requires all courses necessary to fulfill the Biology major requirements (VII/VIIA). Some recommended courses (Biology Restricted Electives, Thermodynamics, Project Lab) also fulfill Biology degree requirements. Students will work with their advisor to determine their Tracks and submit this information to the Education Office by the end of the term in which they graduate. The Biology Department provides official acknowledgement that a student has completed a specific Track.
