**9:00 pm**

## **How Memory Works**

- **MIT neuroscientist Suzanne Corkin describes her decades-long relationship with a famous "pure amnesic" named H.M.**
- **In this web-exclusive video, UCLA's David Glanzman shows what a spineless sea snail can teach us about our brains.**
- **In this bonus video, neurosurgeon Itzhak Fried taps into a patient's brain and witnesses how memories are recalled.**
- **Neuroscientist Andre Fenton, who conducted groundbreaking research "erasing" memories in mice, answers your questions.**
