Overview

Companies and organizations hire consultants to strategize solutions to business, organizational, or industry specific problems. The value in hiring a consultant is a fresh perspective, objectivity, and/or a specific knowledge base or expertise. In the 1990's the consulting industry was at its peak with the rise of Dot coms. In general the consulting industry has experienced a decline similar to that of the Dot coms. The economy has greatly affected the use of consultants.

The Consulting Industry can be divided into the following areas:

- **Management Consulting**: Focus is on how a company or organization works to achieve its stated goals. This can include working on strategy, operations, and information technology.
- **Strategy Consulting**: Focus is on identifying the direction, goals, and growth of a company or organization within a specific industry.
- **Information Technology (IT) Consulting**: Focus is on using technology to help an organization become more efficient and achieve its goals.
- **Industry Specific Consulting**: Focus is on a specific industry and can include strategy, management, IT, scientific or technical consulting.

Case interviews may be used in the screening process for all types of consulting firms, with the exception of IT Consulting, which does not typically use the case interview approach.

How Case Interviews Are Used in the Hiring Process

Consulting is a very conservative industry, be sure to follow industry specific interview protocol. (Details on interview protocol can be located at Wetfeet.com and Vault.com) Recruiting for entry-level consultant positions typically begins in the fall. The process includes a case interview in which the candidate is asked to analyze a problem and provide a solution based on the information given. Case interviews are used to assess a candidate's thought process and analytical skills and are not focused on the answer arrived at by the candidate. A few firms recruit PhDs (a few recruit masters also) from top schools for the Associate level, same track as MBA's. Other firms recruit only undergraduates, or will consider graduate students for the same level as undergraduates.

Resources to Help You Prepare for Case Interviews
