77. The municipal solid waste landfill as a source of Montreal Protocol-restricted halocarbons in the United States & United Kingdom *Hodson* (3/08)
76. Description of the MITgcm atmospheric physics (Fizhi): algorithm and simulated climate *Molod et al.* (10/07)
75. The diurnal cycle of air pollution in the Kathmandu Valley, Nepal *Panday* (6/06)
74. Investigations of cloud altering effects of atmospheric aerosols using a new mixed Eulerian-Lagrangian aerosol model *Steele* (9/04)
73. Estimation of methane and carbon dioxide surface fluxes using a 3-D global atmospheric chemical transport model *Chen* (12/03)
72. The equilibration of an adjoint model on climatological time scales *Bugnion & Hill* (6/03)
71. Mechanistic, sensitivity, and uncertainty studies of the atmospheric oxidation of dimethylsulfide *Lucas* (6/03)
70. Box modeling of the Eastern Mediterranean Sea *Ashkenazy & Stone* (5/03)
69. The 41 kyr world: Milankovitch's other unsolved mystery *Raymo & Nisancioglu* (9/02)
68. Reorganization of Miocene deep water circulation in response to the shoaling of the Central American Seaway *Nisancioglu et al.* (8/02)
67. Snowpack model estimates of the mass balance of the Greenland ice sheet and its changes over the 21st century *Bugnion & Stone* (1/02)
66. The production of non-methane hydrocarbons by marine plankton *Shaw* (9/01)
65. Optimal determination of global tropospheric OH concentrations using multiple trace gases *Huang* (1/00)
64. Measurement and deduction of emissions of short-lived atmospheric organo-chlorine compounds *Kleiman* (9/99)
63. Construction of the adjoint MIT Ocean General Circulation Model and application to Atlantic heat transport sensitivity *Marotzke et al.* (5/99)
62. Terrestrial sources and sinks of atmospheric methyl bromide: 3D modeling of tropospheric abundance and sensitivities *Jensen* (4/99)
61. Inverse modeling of seasonal variations in the North Atlantic Ocean *Yu & Rizzoli* (8/98)
60. Interhemispheric thermohaline circulation in a coupled box model *Scott et al.* (7/98)
59. Seasonal measurements of nonmethane hydrocarbons in a sub-tropical evergreen forest in Southern China *Graham* (7/98)
58. Temporal changes in eddy energy of the oceans *Stammer & Wunsch* (6/98)
57. On convective mixing and the thermohaline circulation *Marotzke* (6/98)
56. The importance of open-boundary estimation for an Indian Ocean GCM-data synthesis *Zhang & Marotzke* (5/98)
55. Boundary mixing and equatorially asymmetric thermohaline circulation *Marotzke & Klinger* (4/98)
54. Impact of the horizontal wind profile on the convective transport of chemical species *Wang & Prinn* (3/98)
53. Adjusting to policy expectations in climate change modeling *Shackley et al.* (3/98)
52. Open-ocean convection: observations, theory and models *Marshall & Schott* (1/98)
51. Global thermohaline circulation. I. Sensitivity to atmospheric moisture transport. II. Sensitivity with interactive atmospheric transports *Wang et al.* (10/97)
50. Destabilization of the thermohaline circulation by atmospheric transports: An analytic solution *Krasovskiy & Stone* (7/97)
49. The global ocean circulation estimated from TOPEX/POSEIDON altimetry and the MIT GCM *Stammer et al.* (5/97)
48. Trapped methane volume and potential effects on methane ebullition in a northern peatland *Fechner-Levy & Hemond* (5/97)
47. Seasonal cycles of meridional overturning and heat transport of the Indian Ocean *Lee & Marotzke* (3/97)
46. Analysis of the North Atlantic climatologies using a combined OGCM/adjoint approach *Yu & Rizzoli* (12/96)
45. Tracer applications of anthropogenic Iodine-129 in the North Atlantic Ocean *Edmonds* (11/96)
44. Boundary mixing and the dynamics of 3D thermohaline circulations *Marotzke* (8/96)

43. The role of aerosols in the troposphere: radiative forcing, model response, and uncertainty analysis *Pan* (5/96)
42. Development of a 3D chemical transport model based on observed winds and use in inverse modeling of the sources of CFC₁₃F *Mahowald* (4/96)
41. The role of vegetation in the dynamics of West African monsoons *Zheng & Eltahir* (3/96)
40. Inferring meridional mass and heat transports of the Indian Ocean by fitting a GCM to climatological data *Lee & Marotzke* (2/96)
39. Analysis of thermohaline feedbacks *Marotzke* (12/95)
38. The Iron hypothesis: basic research meets environmental policy *Chisholm* (12/95)
37. Hydrostatic, quasi-hydrostatic and non-hydrostatic ocean modeling *Marshall et al.* (9/95)
36. A finite volume, incompressible Navier Stokes model for studies of the ocean on parallel computers *Marshall et al.* (9/95)
35. A case study of the adequacy of GCM simulations for assessing regional climate changes *Risbey & Stone* (3/95)
34. On the role of vegetation in sustaining large scale atmospheric circulations in the tropics *Eltahir* (2/95)
33. Sprites, q-bursts and positive ground strokes *Boccippio et al.* (2/95)
32. Subduction of Carbon in the subtropical gyre of the North Atlantic *Follows et al.* (10/94)
31. The growth of convective plumes at seafloor hot springs *Speer & Marshall* (10/94)
30. The CMPO/MIT TOPEX/POSEIDON altimetric data set *King et al.* (8/94)
29. Atmospheric transports, the thermohaline circulation, and flux adjustments in a simple coupled model *Marotzke & Stone* (4/94)
28. Climate dynamics and global change *Lindzen* (3/94)
27. Effects of atmospheric coupling on the stability of the thermohaline circulation *Nakamura et al.* (1/94)
26. Poleward heat transport in a barotropic ocean model *Wang et al.* (12/93)
25. An EPV view of the zonal mean distribution of temperature and wind in the extra-tropical troposphere *Sun & Lindzen* (12/93)
24. Laboratory experiments of chemical reactions on polar stratospheric cloud particles *Beyer* (11/93)
23. A model of the ion chemistry of electrified convection *Boldi* (5/93)
22. Destabilization of the thermohaline circulation by atmospheric feedback *Nakamura et al.* (3/93)
21. Global circuit response to seasonal variations in global surface air temperature *Williams* (3/93)
20. Precipitation recycling in the Amazon Basin *Eltahir & Bras* (1/93)
19. On the response of the tropical atmosphere to large-scale deforestation *Eltahir & Bras* (1/93)
18. On the feasibility of determining surface emissions of trace gases using an inverse method in a 3D chemical transport model *Hartley & Prinn* (11/92)
17. Deducing trace gas emissions using an inverse method in 3D chemical transport models *Hartley* (11/92)
16. An active titration method for the local measurement of tropospheric hydroxyl radical *Sprengnether* (10/92)
15. A description of rainfall interception over large areas; AND On the estimation of the fractional coverage of rainfall in climate models *Eltahir & Bras* (8/92)
14. The Schumann Resonance: A global tropical thermometer *Williams* (5/92)
13. The heterogeneous reaction HOCl → HCl₂ + H₂O on ice and nitric acid trihydrate: Reaction probabilities and stratospheric implications *Abbatt & Molina* (4/92)
12. Forecast cloudy: The limits of global warming models *Stone* (3/92)
11. The implementation and validation of improved landsurface hydrology in an atmospheric general circulation model *Johnson et al.* (2/92)
10. Inferring the annual-mean subduction rate over the North Atlantic *Marshall et al.* (1/92)
9. The role of ice in the conditional instability of the tropical atmosphere *Williams & Renno* (11/91)
8. Nonmethane hydrocarbon chemistry in the remote marine atmosphere *Donahue* (7/91)
7. Global-scale sea surface variability from combined altimetric and tide gauge measurements *Wunsch* (1/91)
- 5/6. Non-linear dynamics of soil moisture at climate scales: Stochastic analysis and chaotic analysis *Rodriguez-Iturbe et al.* (11/90)
4. Atmospheric emissions and trends of nitrous oxide deduced from ten years of ALE-GAGE data *Prinn et al.* (6/90)
3. A scheme for representing cumulus convection in large-scale models *Emanuel* (4/90)
2. On the limitations of general circulation climate models *Stone & Risbey* (3/90)
1. An annotated bibliography on greenhouse effect change *Handel & Risbey* (4/92)
