BD (Becton, Dickinson and Company), a leading global medical technology company, is seeking high-potential technical talent for its Technology Leadership Development Program (TLDP) and will be hosting a booth at the MIT career fair on Thursday, April 3rd and an information session at the Marriott in Kendall Square from 3:30-5:30 pm on Friday, April 4th.

The TLDP’s vision is to develop future leaders of BD’s R&D organization by providing TLDP associates with broad and deep technical assignments across BD. Candidates should have a doctorate or research-based Master's degree with appropriate technical depth, in life sciences or engineering fields, such as mechanical engineering, electrical engineering, biomedical engineering, chemical engineering, materials science, chemistry, immunology, microbiology, biochemistry, cell biology and related fields; additionally candidates should have a well-demonstrated track record of excellence in research as well as leadership. For more information, please attend the information session and visit the website at http://bd.com/careers/university_relations to apply".
