MIT International Science & Technology Initiatives (MISTI)

MIT Korea

- **What:** Summer 2014 internships in Korea, all expenses paid + stipend/salary.
- **Who:** ChemE undergrads in with ~2 years language training or equivalent experience, and grads with or without language.
- **Where:** R&D centers of SK Innovation, the Korea Institute of Science & Technology, Hyundai Motors, and Samsung Electronics (click to explore!)
- **When:** 9-12 weeks (or even longer) from May/June to August 2014.
- **How:** Simple. Go to [http://web.mit.edu/misti/students/apply.html](http://web.mit.edu/misti/students/apply.html), upload a resume, and make an appointment to chat w/ Matt. Or just email him.
- **Why:** Because intensive international experience is critical professionally and personally. And because Korea's amazing! Nowhere will you experience the same sights, sounds, and culture of a country whose exceptional achievements and transformative changes over the last 50 years have led to ancient history mixed with cutting-edge modernity, technological achievement conjoined with traditional Confucianism. Korea is fun, challenging, and off the beaten path.
