Do you want to learn about both computational and experimental research?
Do you want to perform research with close interaction with a faculty advisor?
Do you want to work in state-of-the-art facilities and learn new skills?

If so, join us at one of the most beautiful campuses in the nation: The University of Alabama. During the summer of 2014, we will have a wide range of projects:

- Biofuel Metabolic Network Modeling
- Computational Design of Nanoparticles
- 3-D Printing for CO₂ Capture Applications
- Mechanical Behavior of Metallic Glasses
- Modeling Thin Film Growth
- Thermoelectric Materials
- Blast Impact Simulations
- Modeling Stem Cell Formation

Plus, all students will have the opportunity to present their research at the Annual AIChE Meeting in Atlanta, GA!

Application process opens in JANUARY (for summer 2014)
