SBH Sciences is seeking a scientist/associate scientist for our Biomarker Analysis group. In this position, you will be running immunoassays as well as a variety of other functional assays, including multiplex analysis, enzyme activity assays and drug screening. The work involves analyzing many different types of samples for client-driven projects. Additionally, you will be responsible for laboratory management activities, including maintenance of instrumentation, record-keeping and laboratory upkeep. You will report to the group leader of Biomarker Analysis.

The position requires a BS or MS in biochemistry or related discipline, and relevant laboratory experience (academic or industry). The ideal candidate will have good working knowledge of ELISA and Luminex assay systems, and working knowledge of cell culture techniques. Solid quantitative skills and an understanding of basic biochemistry are required, as are the ability to work comfortably in a dynamic, fast-paced environment and function well in teams with a variety of other personnel.

SBH Sciences is a privately held, contract research organization located in Natick, MA. In addition to CRO work, we are involved in a variety of novel research activities including protein production and purification, drug discovery, carbohydrate analysis and assay development. We are an ideal company at which to build your scientific expertise and professional network in the biotech industry.
