McKinsey MD Fellowship

McKinsey & Company is excited to announce a two year fellowship opportunity for medical students to experience the business of medicine. Join us between your third and fourth years of medical school to develop as a future leader in health care through a world-class apprenticeship in solving business problems and leading in the business context.

**MD Fellows will have an unparalleled opportunity**
* Gain real-world experience in the business of medicine
* Develop skills with direct and lasting relevance for a broad range of future opportunities
* Receive extensive senior mentorship and a full curriculum of professional development
* Build personal and professional networks by working with the recognized leader in health care management consulting

**Considerations**

- **Eligibility** - we ask that you apply during the fall prior to the summer you wish to enter the fellowship. Fellowships must take place between 3rd and 4th years.

- **Interviews** – we have two primary application cycles, both for start dates in summer 2016. The interview process will be identical to the process for fulltime APD candidates. Invitations to these interviews will be sent approximately 2-3 weeks after the deadline

  **Fall Interview Cycle:** July 20, 2015 application deadline with interviews taking place in August – October 2015
  **Winter Interview Cycle:** December 7, 2015 application deadline with interviews taking place in January-February 2016

You can apply by visiting this page: [www.mckinsey.com/MDFellow](http://www.mckinsey.com/MDFellow)

- **Interviews** - Fellowship locations - select US offices. You will be able to indicate initial office preferences in your application and final selection is done prior to round 2.

- **Salary and full benefits** will be offered for the duration of the fellowship

Learning, internship and full-time opportunities for medical students, interns, residents & fellows

1-3 Day Learning Programs

**Insight Healthcare** - A three-day insider's look into management consulting for medical students, interns, residents and fellows, PhDs and post-docs in healthcare-related disciplines.

- **Timing:** Weekend in June
- **Selection:** application and phone screen in April-May
- **Eligibility:** medical students, interns, residents and fellows 1-2 years out from completing their programs

**MD Contact** – A one-day seminar designed to familiarize medical students, interns, residents and fellows with management consulting and network with focused group of peers and MD consultants.

- **Timing:** Regional programs on Saturdays in June
- **Selection:** application and phone screen in April-May
- **Eligibility:** medical students 1-2 years out from completing their program: interns, residents and fellows at any point in their training

**Internship Consulting Experience**

**Summer Associate Internship** – The Associate Internship program is the best opportunity to explore management consulting at McKinsey. It gives each participant the opportunity to work on a client project as a member of a McKinsey team. The internship is a paid position available in any of our North America offices.

To learn more, visit: [http://www.mckinsey.com/careers](http://www.mckinsey.com/careers)

- **Timing:** 8-12 weeks (6 may be possible), generally in the months of May through August.
Fellowship and Full-time Opportunities

MD Fellowship- We are excited to announce the McKinsey MD Fellowship, a new experiential learning program for medical students who seek to become proficient in the business of medicine. The paid MD Fellowship offers medical students, between their third and fourth years, the opportunity to spend two years as a McKinsey consultant, working with healthcare leaders in the private, public, and social sectors. Offered in many of our North America offices.

To learn more, visit: https://www.surveymonkey.com/s/MDFELLOW

Full-time Associate – Most advanced professional degree graduates start their careers at McKinsey as Associates. Associates lead a key portion of an engagement. They apply a broad range of creative problem-solving skills, combining technical and analytical excellence. They synthesize conclusions into recommendations and work directly with senior leaders to implement change. Associates develop foundational knowledge across each of the basic functions (e.g., strategy, organization, and finance).
