The Charles Heidelberger Symposia are broad cancer research meetings organized annually or biennially to honor the late Charles Heidelberger, former president of the American Association for Cancer Research, member of the National Academy of Sciences of the U.S.A., and an extraordinary scientist in the fields of carcinogenesis and cancer chemotherapy who has patented 5-fluorouracil (5FU).

The 16th International Charles Heidelberger Symposium on Cancer Research (16ICHSCR) will bring together scientists from around the world to Coimbra (Portugal) to present their achievements and discuss the most recent advances in cancer, from basic research to clinical applications, in addition to world-leading specialists on cancer research selected and invited by the Local Programme Committee and by the International Advisory Committee. The Scientific Programme includes the following sessions:

- Cancer Etiology and Epidemiology
- Molecular Carcinogenesis
- Tumor Microenvironment and Tumor Cell Biology
- Cancer Genetics and Epigenetics
- Translational Cancer Medicine
