MIT BE-BMES Presents A Panel Discussion

Choosing A Major Panel

Tuesday, March 9th @ 7:15 pm in Room 1-190

Not sure what major you're pursuing? Want first hand advice from professors in each department? This meeting will provide a forum for students (especially freshman), who are interested in bioengineering, to ask questions about the differences and similarities among different Courses. This panel will elucidate the prevalence of bioengineering in multiple disciplines and answer any relevant questions. Each department (Courses 2,3,6,7,8,10,20) will provide a 5 minute presentation, each of which will highlight the strengths of pursuing bioengineering in their curricula.

Post questions at http://tinyurl.com/askBEpanel that you want answered at the discussion. A Q&A session will follow the presentations.

Featuring:

Course 2: Professor Peter So

Course 3: Professor Michael Cima

Course 6: Professors Eric Grimson and Jay Han

Course 7: TBD

Course 8: Professor Jeff Gore

Course 10: Professor Paula Hammond

Course 20: Professor Ernest Fraenkel

...as well as current undergraduate students from each major to answer any of your questions!

Dinner will be served prior to the event at 7:15 PM, with the panel starting at 7:30 PM.
