The Hottest Jobs on Earth

1366 offers exciting opportunities in the solar photovoltaics boom industry

1366 Technologies is a well-funded and highly regarded startup venture that has already gained the confidence of the US Department of Energy, some of the largest VC firms, and the most successful players in the solar industry.

We are looking for engineers with degrees in MechE, ChemE, Applied Physics, Mat. Sci. and EE to help drive development, scale-up and commercialization of our solar cell manufacturing technologies.

Company Info Session
Monday, March 19, 7:30 PM
Room 56-154

Please send your application to: vtarasov@1366tech.com

Solar at the cost of coal
