**Intel Corporation** has several openings for physical science Ph.D.s. to support/direct research and development of advanced processing methods used to manufacture the next generation of microprocessors.

Positions are available in the areas of thin film deposition, electrochemistry, and chemical mechanical polish.

Openings are at Intel’s primary development facility (Ronler Acres) located ~10 miles west of Portland OR.

Ph.D. candidates in Materials Science, Chemistry, Chemical Engineering, Physics, Electrical Engineering or related fields should email resumes to Jeff Cheng at **yang-chun.cheng at intel.com**
