Open Mic Session with Eric Buehrens, Chief Administrative Officer
Beth Israel Deaconess Medical Center

Tuesday, April 10th, 2012
7:00 – 9:00 PM
Trust Center for MIT Entrepreneurship, One Amherst Street, E40-160, Cambridge, MA

The time is right to hack healthcare, but as entrepreneurs we often are setback because we can’t get to the people that are making the decisions in healthcare settings, government, and industry. To help fix this, Bob Higgins, Richard Foster, Jim Dougherty and Hacking Medicine have teamed up to bring you Eric Buehrens, the former Chief Administrative Officer from Beth Israel Deaconess Medical Center (BIDMC), one of the largest and most prestigious academic medical centers in the world. If you ever want to sell or partner with a hospital, Eric is the ideal person to speak to because he is the one who makes the decisions at the top. Prior to his current role, he served as Interim President and Chief Executive Officer of BIDMC. The goal of this event is to help connect entrepreneurs to the marketplace and give you open access to Eric Buehrens and ask him those questions you can’t find the answer to on any website. Also we are going to select 3-5 student entrepreneurs to give their 60 second pitch at the end of the event and get direct feedback from Eric Buehrens himself. If you would like to pitch, please answer a couple of quick questions here.

Event Schedule:
• 7:00 – 7:15 PM: Registration Opens  (free pizza and drinks will be served)
• 7:15 – 7:30 PM: Student Idea Pitches
• 7:15 – 8:30 PM: Open mic session with Eric Buehrens

Event Schedule:
To register for the event, please sign up here
