Unique SUTD-MIT Graduate Fellowship Opportunity
for MIT Graduate Students
--includes full 12 months of financial support!

MIT, in collaboration with the Singapore University of Technology and Design (SUTD), is seeking to appoint two (2) MIT graduate students to a 12-month fully funded fellowship for students who can be in residence in Singapore in Fall 2016 or Spring 2017 and can assist in TA’ing/teaching in the following undergraduate courses at SUTD:

Advanced Math I (first semester of freshman calculus)—Summer 2016 (semester begins May 16)
Advanced Math II (second semester of freshman calculus)—Fall 2016

Program Overview:
- 6+ months at MIT conducting your current research with no strings attached
- One full term at SUTD in Singapore where your time will be divided between a teaching-related assignment (50%) and your current research (50%). Generous travel allowances and flight to and from Singapore are included.

PhD candidates must have completed their qualifying exams in order to be eligible. Graduate students are preferred who have TA’d a course previously and who have considerable experience with the course content.

Funding is available for a full year. Funding runs from June 1, 2016 - to May 31, 2017.

Depending on the student's research area, there are opportunities for collaboration with SUTD faculty--as long as it is synergistic.

E-mail Jon Griffith today to learn more about this unique opportunity! Application deadline is February 25, 2016.

Jon Griffith
Asst. Director, MIT-SUTD Collaboration
