## Humanities, Arts, and Social Sciences Education Office

Academic year 2005 was a busy year for the Humanities, Arts, and Social Sciences (HASS) Education Office. The office continued to provide administrative and clerical support to the HASS Overview Committee (HOC), which completed its usual tasks of licensing HASS-D subjects this year - both new and renewals - as well as approving new HASS Communication Intensive (CI-H) subjects and dealing with many other HASS curriculum issues. The HOC again discussed evaluation of CI-H subjects; this will be a major topic for the upcoming academic year.

Professor Charles Stewart, who serves on the Task Force on the Undergraduate Educational Commons and chairs the HASS Subcommittee of that group, solicited HOC members' input regarding the HASS component of the General Institute Requirements before resigning as HOC chair and associate dean of the School, effective January 1, 2005, to become head of the Political Science Department. Philosophy professor Ned Hall served as interim HOC chair for the spring semester. The director of the HASS Education Office, Dr. Bette Davis, served as an ex officio member of HOC, and administrative assistant Amy Devin took the minutes.

In addition to working with HOC, the office continued with its normal work of producing the HASS Guide each term, handling HASS concentrations and minors (and the Harvard Cross-Registration Program), and compiling various statistics for the dean. We also maintained five databases: the CI-H, HASS Minor, Course 21 Majors, Harvard Cross-Registration, and "Mailing List" databases.

Special projects this year included working with the Registrar's Office to put the petition for HASS credit on the web. We are also working with a private design firm and MIT's Web Communications Services to integrate the HASS Education Office website into the relatively new SHASS website. A second round of usability testing is scheduled for July 2005, and the new website should be operative soon thereafter. Another project has been to explore the possibility of automating HASS concentrations and minors, but this has been put on hold until the Task Force on the Undergraduate Educational Commons makes its report and recommendations.

Dr. Davis continues to be involved with the undergraduate exchange component of the Cambridge-MIT Exchange - specifically, helping to facilitate MIT students' receiving HASS credit for papers done at Cambridge. As part of this effort, she traveled to Cambridge in early October.

## HASS Enrollment Statistics

Total enrollments in all HASS subjects were down again - from 9,861 in AY2003 and 9,610 in AY2004 to 9,362 this year. Slightly fewer HASS subjects were offered-462, as compared to 469 in AY2004. There were also slightly fewer autonomous sections-596 for AY2004 and 590 for AY2005. The number of HASS-D subjects taught was down slightly - 111, as compared to 119 last year. (One hundred eleven HASS-D subjects were also taught in the previous year, AY2003.)

The two fields with the largest overall enrollments were the same as last year, and in the same order: 1,746 in economics (up from 1,629 last year) and 1,601 in foreign languages and literatures (up from 1,523 last year). The fields with the third- and fourthhighest enrollments also remained the same: literature (915) and writing (713). They were followed by music (631) and political science (597). (The figure for music does not include six-unit music performance subjects.)

Although there was a considerable range among the various HASS disciplines-from a significant drop in enrollments all the way to a significant increase-the majority experienced a decrease, whether large or small. The increases of $16 \%$ in linguistics (from 187 to 216 ) and $13 \%$ in history (from 507 to 572) were the largest in terms of percentage. They were followed by a $7 \%$ increase in economics (from 1,629 to 1,746 ), a $6 \%$ increase in women's studies (from 96 to 102), and a $5 \%$ increase in foreign languages and literatures (from 1,523 to 1,601). In contrast, enrollments in urban studies remained exactly the same, and music had very nearly the same number of students. All other fields experienced a decrease.

## HASS Concentrations: Patterns of Popularity

In AY2005, students submitted 2,068 HASS concentration proposals and 1,126 completion forms, as compared to 2,165 proposals and 1,148 completion forms the previous year. Once again, economics and foreign languages led in the number of completed HASS concentrations: 334 in economics (versus 322 in AY2004) and 195 in foreign languages and literatures (versus 221). (For a breakdown by languages, see Table 2.) The next most popular field of concentration is music, with 106 completed concentrations. These three are followed at a distance by political science (56), philosophy (51), and literature and history, tied at 49.

## HASS Minor Programs

Academic year 2005 showed a decrease in the total number of HASS minor applications from all graduating classes - 436, as compared to 467 last year. The number of HASS minors received by the Class of 2004 was also down - 198, as compared to 225 last year. The two most popular fields as measured by the number of applications filed were the same as last year: economics, with 152 , and music, with 50 . There were 45 minor applications in foreign languages and literatures ( 2 in Chinese, 16 in French, 8 in German, and 19 in Spanish), 33 in political science, 30 in applied international studies, 22 in literature, 15 in comparative media studies, and 14 in writing. The 198 HASS minors received by members of the Class of 2005 were in 24 fields.

## Harvard Cross-Registration

The number of MIT undergraduates cross-registered for courses at Harvard declined again in AY2005. Some 224 students took 258 subjects at Harvard; this compares to 250 students enrolled in 283 subjects in AY2004. In AY2003 there had been an increase, the previous year saw a decrease in these enrollments, and the year prior to that there had been a sizable increase - enrollments seem to fluctuate for no obvious reason. As usual, foreign languages were the most popular field of study, although they constituted a smaller portion of the total number of subjects than they had previously. Some 103 of
the 258 subjects were in 19 different foreign languages. The most popular language was Russian with 13 students. It was followed by Hebrew and French, with 11 each, then Korean with 10. Arabic had 8 students, and 7 took Urdu-Hindi. Enrollments in other languages ranged from 1 to 6 . The most popular field outside foreign languages was psychology, with 29. Following psychology, other popular fields were mathematics and economics, with 16 each, followed by government, with 13 , and history, with 12.

## Undergraduate Degrees Granted in SHASS

There were 83 students who received the SB in SHASS this year, up from 78 last year. Of these, 33 degrees were in economics (Course 14) and 15 were in political science (Course 17). During the same time period, September 2004 through June 2005, a total of 25 students completed the SB degree in humanities (Course 21). Four of these received joint degrees, three in 21-E and one in 21-S. Another 18 received degrees in a specified field within Course 21. Two students received the SB in philosophy and another received the SB in linguistics and philosophy (Course 24). Seven students were awarded the SB in comparative media studies (CMS).

## Undergraduate Majors in SHASS

The four departments in SHASS had 141 undergraduate majors this year (this figure includes only first degrees). Sixty of these were in Economics, and the Political Science Department had 33. Thirty-one students had a humanities major as their first degree; of these, 7 were joint majors ( 6 in 21-E and 1 in 21-S.) Of the 20 specified majors within humanities, writing, and literature, each had five majors; music and history each had four. Eight undergraduates had a first degree in philosophy or in linguistics and philosophy. Nine students majored in CMS.

## Honors and Awards

Among the more notable honors achieved by SHASS majors this year were the following:
-Todd Anderson ESG Teaching Award: Heather M. Jones '05
-The Boit Manuscript Prize: Fiction, 1st prize: Adora Asala '05
-The Boit Manuscript Prize: Essay, 2nd prize: Matthew R. Burns '05
-The Robert A. Boit Writing Prize: Poetry, 1st prize: Jessica Young '06; 3rd prize:
Matthew R. Burns '05
-The Robert A. Boit Writing Prize: Short Story, 1st prize: Jocelyn Rodal '06, 2nd prize: Adora Asala '05
-The Robert A. Boit Writing Prize: Essay, 2nd prize: Matthew R. Burns '05 and Jessica Young '06
-Burchard Scholars: Leila Agha '06, Lydia Chilton '06, Jonathan Harris '06, Wen Li '06, Mitra Lohrasbpour '07, Christine McEvilly '07, Ruth Miller '07, and Christopher Suarez '06
-Undergraduate Economics Association Award for Excellence in Writing: 1st prize: Jennifer La'O ’05; honorable mention: Lydia Chilton '06 and Fernando Duarte '05
-Austin Kelly III Essay Prizes: Daniel Stein '05
-Phi Beta Kappa: Anna Marie Bohmann '05, Meisha Onelle Farida Bynoe '05, Ariel Nadav Edelstein '05, Erkko M. Etula '05, Sheila Meena Krishna '05, Amy Beth Luxenberg '05, Lara Anne Rogers '05, and Daniel Ethan Stein '05
-Jeffrey L. Pressman Award: Claudia Gold '06 and Jocelyn Rodal '05
-Louis Sudler Prize in the Arts: Daniel Stein '05
-Anthony and Rosina Sun Fellowship: Geoffrey Kigongo '06
-Philip Loew Memorial Award: Arshan Gailus '06
-Emerson Fellows Certificates of Appreciation: Daniel Stein '05 and Mahni Ghorashi '05
-Achievement Award in Literary Studies: Mahni Ghorashi '05 and Faye Kasemset '05
-Howard R. Swearer Student Humanitarian Award: John Velasco '05
-"In Search of Don Quixote" Award: Anna Marie Bohmann '05 and Kelly Cavazos '07
-January Scholars in France: Noelle Kanaga '06

- Award for Excellence in Foreign Languages and Literatures, 1st prize: Sheila Krishna '05

## Bette Davis <br> Director

More information about the Humanities, Arts, and Social Sciences Education Office can be found online at http://web.mit.edu/afs/athena.mit.edu/org/h/hass/www/.

[^2]
[^0]:    ${ }^{\text {a }}$ Music and Theater Arts six-unit performance subjects are not included in these statistics.
    Notes:

    1. Figures were obtained from the MITSIS system, which shows the final tally for each class.
    2. The numbers shown are for undergraduate subjects that normally satisfy the HASS Requirement; they do not include subjects allowed by petition. 3. The column for (Sections) indicates the number of autonomous class sections; it does not apply to subjects that meet in a single lecture and divide into discussion sections.
    3. For joint subjects, figures are given for the subject number under which students enrolled.
    4. HASS-D Language Option subjects (Level III or IV languages) are included in the HASS-D figures.
