Dear Anders,
We received the package of samples from you today, thank you very much for sending it. However, we needed a sample of the shell, rather than the dermal sclerite. Would it be possible to receive a few samples of the shell instead?
Thank you again for your assistance,
All the Best,
Christine Ortiz

Dear Christine,

I will get something out for you in a day or two.

Dear Anders,
We have obtained some very interesting results so far on the structure (attached) and mechanical properties of the shell cross- section and are getting ready to publish the data. We were wondering if you might be able to spare one or two more samples? If so, could you mail them to the following address?

Jeremy Brittan
Massachusetts Institute of Technology
Department of Materials Science and Engineering RM 12-009
77 Massachusetts Avenue
Cambridge, MA 02139 USA

Thanks so much in advance,
All the Best,
