*You are admiring a fascinating Sea Urchin specimen, a Podophora atratus (Linne, 1758) measuring a very nice 68.3mm...fantastic form & a spectacular coloration is displayed on this amazing creature. This beauty was collected from the Andaman Sea off Raya Island, Thailand. This rarely seen species resides in the Echinometridae family...must admit, I really love it. Thank you for visiting our store this evening...and an excellent choice, too.*
