STOP – Security Tracking of Office Products

Laptops, and some other small electronic devices, can be tagged with the STOP Tag. This loss prevention measure is a visible deterrent to small electronic devices. Once applied it takes 24 hours for the glue to cure then it takes up to 800 pounds of pressure to remove the tag. If removed, it leaves a tattoo stating stolen property.

Each item tagged cost \$10 cash. We do not accept Tech Cash.

Sept. 23	11:30 – 1:30	Lobby 10
October 23	11:30 – 1:30	Lobby 10
