The following are the rules for *Truth or Consequences*, a real-time, real-space roleplaying game sponsored by the MIT Assassins' Guild. You are responsible for knowing these rules. Many of them are nigh impossible to enforce and rely upon the honor system. Do not cheat. Do not abuse loopholes. Play fair. Be your own harshest critic.

The *gamemasters* (GMs) run the game. If you have any problems or questions concerning the game, contact a GM. Rulings they make are final. They may violate the letter of the rules to preserve the spirit. The GMs promise to be as fair and reasonable as possible. Neither they nor these rules are perfect. This game is intended to be fun. Getting into character, role playing, being dramatic, and playing competitively can all increase the fun of the game. Do not take the game too seriously. Even if you are losing, keep a good attitude. When the game is over, the real winners are the players with the best stories.

This game is a work of fiction. Although it may refer to things in the real world, it does so only for the sake of the scenario. It does not represent the opinions of the GMs or the MIT Assassins’ Guild. These rules are modifications of those used in previous games. This game and all materials thereof are copyright 2008 by Christian Ternus, Dennis V. Perepelitsa, Liz Hanson, and the MIT Assassins’ Guild.

**Brought to you by the MIT Assassins' Guild**

---

1 Getting Started

This is a set of rules often used in Assassins' Guild games. The Truth or Consequences Rules Addendum contains additional rules and overrides some of these. We have decided to leave this document unchanged, to introduce new players to rules commonly used in Assassins' Guild games. Everything in this document is superseded by the Rules Addendum. In particular, Truth or Consequences does not use the Martial and Ranged combat rules described in this document. If you are new to the Guild, you should read this carefully.

1.1 Character Packets

Your character packet is a big manila envelope. It contains your role: who you are, what you're up to, everything about your part as a *player-character* (PC) in the game. Read all the contents and generally keep them with you during the game. If you are missing something or find something which doesn't seem to belong to you, tell one of the GMs. Character packets are confidential. Game materials which cannot be given to other players are marked “Not Transferable,” whereas things which can be given to others are marked “Freely Transferable” or “Game Item.”

**Name-Badge:** A name-badge with your player name, character description, and *badge number* on it shows that you are in the game; wear it visibly while you are playing. It represents your character's body in-game. Badge numbers are not in-game information. See the Character Bodies and Badge Numbers sections for more details.

**Character Sheet:** Your character sheet describes who you are and what you are up to. It contains a list of everything else that should be in your character packet. Do not show or read your character sheet to other players.

**Bluesheets:** A bluesheet describes information common to members of a group. When in conflict, character sheet information overrides bluesheet information. Do not show or read a bluesheet to other players.

**Greensheets:** A greensheet describes and expands abilities, mechanics, or in-game knowledge. Do not show or read a greensheet to other players.

**Stat Card:** Your stat card lists your statistics. You might not know what all of your stats mean. Do not show your stats to others. The reverse side is a *death report*; fill it out and give it to the GMs when your character dies.

**Ability Cards:** An ability card explains a special ability your character has. The front side describes the effects; show it to players when you use the ability. The reverse is the rules of use and must not be shown to other players.

**Memory/Event Packets:** A memory packet is an envelope or stapled piece of paper with a *trigger* which describes when to open and read it. If the trigger is a number, open the packet when you see something with that number. If it’s a quoted phrase, open when you hear or read it in-game. If it’s a symbol, open when instructed. Do not take game action based on an unopened trigger. Do not show or read a memory packet to other players.

**Items:** In-game items may be transferred from character to character, and should be marked as such. See the Items Etc. section for more details.
1.2 Reality and Game Reality

There is a big difference between reality and game reality. Players must treat each other with courtesy and explain to each other what their characters perceive in confusing situations; e.g. “My character’s hands are covered in blood,” an out-of-game statement. Characters are under no such restrictions, and may do what it takes to further their goals; e.g. “Uh, hi Bob. Just got back from the butcher shop,” an in-game statement.

Metagaming is inferring in-game knowledge that is inappropriate for your character from out-of-game information. Do your best to not metagame and especially to prevent the risk of metagaming. Be your own harshest critic.

1.3 Basic Strategy

Make sure you understand the rules. If you are completely confused, get a GM who will try to help you out. Make sure you know enough about your character to role-play him or her when you start talking to other people. Read through your entire packet a couple of times, and skim through it again right before game starts. If you don’t know something about your character, ask a GM.

As a character, your first priority should be to open lines of communication. Contact people, show up at meetings, and chat. Try to be easy to get in touch with. Ask people questions on relevant subjects. They’ll probably lie, but you may find something out.

There are no guarantees that you can trust anyone, but since cooperation is the key to accomplishing things, you will be forced to trust people anyway. The most trustworthy people are probably those who need you.

2 Items Etc.

Many in-game items are represented by a white card with a number and description. Item cards may be shown to others, or be in your pocket. Item cards may be shown to others, or be in your pocket. Item cards may be shown to others, or be in your pocket. Item cards may be shown to others, or be in your pocket.

Non-Player-Characters: Non-player-characters (NPCs) are characters in the game’s universe not played by a full-time player. They are minor characters, bit parts, or random people. Some may have name-badges; sometimes called “GM plants,” these are often not readily distinguishable from PCs.

Mechanics: Many actions your character can take, such as walking, talking, and general interaction with other characters, are represented by you doing them. Others, like combat, are performed via abstract mechanics, which are described in abilities cards, greensheets, and rules. The abstract information for mechanics (like badge numbers) may be not be discussed in-game. If you want to do something special for which there is no mechanic, ask a GM.

Become familiar with your mechanics before game starts, especially those which occur under time-pressure (like combat). Game action will not stop for memory packets, greensheets, or such.
Bulkiness: A bulky item is too big or heavy to be carried or concealed freely. Bulkiness is measured in hands or dots (how many hands it takes to carry it). If you are carrying a bulky item, make it clear to onlookers (hold the card). A hand carrying a bulky object may do nothing else. With one hand less than required, you may drag a bulky item at a slow pace.

Props: Some items may have props (physical representations or physreps) associated with them. The card and physrep should be kept together. If they are separated, the card is the real item. Prop items are as bulky as the physrep. They can be carried in bags that can hold them, on straps that are attached to them, etc.

Containers: Some items, like crates or personal bags, have a capacity. Capacity is measured in dots or hands; this is how many dots of items can be stored within. You can put as many non-bulky items inside as is within reason. A container may have a capacity bigger than its bulkiness; use common sense when nesting containers. Put contained item cards inside the envelope attached to the container card.

Character Bodies: A body is three hands bulky and usually represented by a name-badge. It must be willing or unable to resist for you to carry it. Carry the badge conspicuously. Onlookers can’t tell if it’s dead without close examination, unless it would be obvious (like headless).

2.1 Searching, Stashing, and Stealing

Places: To search a place, search it. Normal items can be stashed in any reasonable, legal place. Don’t put items behind locked doors, inside ceilings, in construction sites, or in hacking locations; consequently, don’t go rummaging through such places for game items. Don’t stash or search in places that are not in-game; see the Game Areas section for more information.

People: All searches of characters or their belongings are conducted via player dialogue. Someone must be willing or unable to resist for you to search them. You need at least one free hand to search someone. Anyone within ZoC of either you or your victim can prevent the search by saying “I stop you” or an equivalent phrase.

You can perform a put-down search, which will only reveal the presence of weapons. This takes as much time as it takes your victim to tell you what you find. If you’re the victim, do this at a reasonable pace.

A total search is an invasive, complete search of a character’s clothing. This reveals all in-game items, and takes as long as your victim spends handing over possessions. If you’re the victim, hand over items at a reasonable pace.

Bags: To search a bag in someone’s possession, say “I search your bag.” This proceeds just as a total search. To search a bag that is obviously in-game (has an attached, displayed item card), search the physrep. Item cards in the bag must be in reasonable places. If the item card has a capacity and an envelope, the bag is just a prop and all in-game items should be in the packet.

To search a bag that is not obviously in-game (no visible item card attached), spend thirty seconds by the bag, put a “searched (see a GM)” note on the bag, and come tell a GM. Tell any onlookers that they see you searching through the bag. Search an attended bag via player dialogue with the owner; they must be willing or unable to resist. If someone searches a bag you are holding, hand over all game items inside at a reasonable pace.

If you find a “searched” note on your bag, come see a GM. To declare a bag out-of-game, label it “no game items.”

3 Violence, Damage, and Death

3.1 Health States

Characters have five possible states, concerning health and damage. When you are fine, you may act freely. When you are restrained, you are helpless and may do nothing but talk. When you are knocked out, you will wake up in five minutes. When you are wounded, you are unconscious, bleeding, and will die in five minutes. When dead, you are dead.

When knocked out or wounded, fall down and drop anything you are holding. Just lie there. You won’t be doing much of anything until you wake up. Do not listen to conversations going on. Dead men tell no tales. If dead, do not give out any information about your character or death to any players. You may remain associated with them. The card and physrep should be kept together. If they are separated, the card is the real item. Prop items are as bulky as the physrep. They can be carried in bags that can hold them, on straps that are attached to them, etc.

When you leave, place the front of your name-badge with a description of the body’s obvious state. Take the “I’m Not Here” side to wear. Stack your items with your body. Fill out your Death Report. Make sure the GMs know about your death. If your death becomes generally known to the other characters, you may be able to become an observer. Until the game is over, you may not convey game information to any player.

3.2 Weapons

All weapons have both a physrep and an item card; keep these together. Weapon effects are on the card. To use a weapon, you must have it in your hand and unobstructed. Display it in an obvious manner. You cannot hold more than one weapon in a hand. You may only use one melee weapon at a time.

3.3 Killing Blow

A killing blow will kill a helpless victim. Your victim must be within ZoC and either unconscious or restrained. You must use a weapon (melee or ranged). Clearly incant “killing blow one, killing blow two, killing blow three” at a reasonable pace. During the incant, if you are attacked or if someone within ZoC says “I stop you” or an equivalent phrase, you are stopped. To stop a killing blow, either attack the person doing it or say “I stop you” within ZoC.

3.4 Ranged Combat

Ranged combat is real-time and mostly based upon player skill at firing and dodging physreps. Keep it safe. Hits to anywhere on the body count the same; don’t aim for the head. If a projectile hits clothing or long hair such that it would not hit the body when passing through, it doesn’t count. Hits to an item you hold count as a hits on you, not the item. If there is a conflict over whether or not a projectile hit, the shooter calls the shot. All ranged projectiles have the same effect: if and when you are hit by one, you become wounded. There are two types of ranged projectiles: bullets and throwing knives. Bullets, represented by either plastic discs, plastic darts, foam darts, or koosh rings, can be fired by various types of guns. Ammo is unlimited. A throwing knife is physrep’ed by a small foam knife. Throwing a knife to do damage requires an ability.

3.5 Martial Combat

All characters have a Combat Rating (CR) stat. This represents your basic skill in martial combat; you use the same number for attacking and defending. Someone with a CR of one can’t fight very well. Someone with a CR of three is somewhat burly or skilled. When using this stat, you may pull your punches by using a lower number.

To martial-attack someone, clearly state your attack and CR (“Knock Out 2”, “Wound 2”, etc.) from within ZoC. You need the ability card for any attack you make; you don’t have to display it. Your attack must resolve before you make another; otherwise, you may act freely. If an ally directs Assist at you after you attack, you may, within 2 seconds, restate your attack with the Assist’s CR added (“Wound 3”, “Assist 2”, “Wound 5”). Assist does not change your CR for defense. You may ignore an Assist.
When martial-attacked, resolve by comparing the attack against your CR. If your CR is lower, take the effects; else, say “resist” and the attack has no effect. If you neither say “resist” nor state your own attack within two seconds of the incant’s end, you are surprised and the attack just works. The attack begins when the incant begins; until you resolve, all of your actions other than martial attacks are interrupted; serial attacks don’t prevent simple actions (talking, weapon-drawing, ranged attacks) in-between. Resolve all attacks alone, in the order they occur; choose the order if it is unclear. If you are attacked with “waylay” instead of a CR (“Knock Out waylay”), the attack just works.

Martial Attack Abilities: Here is a list of attack abilities. Everyone has Knock Out, Wound, and Assist. Only some people will have Disarm and Restrain. Other attack abilities may exist.

**Knock Out.** You can knock someone out as an attack. This requires a blunt weapon. Say “Knock Out” and your CR.

**Effect:** I knock you out.

**Wound.** You can wound someone as an attack. This requires an edged weapon, such as a knife. Say “Wound” and your CR.

**Effect:** I wound you.

**Assist.** You can assist someone else’s attack. You must be within ZoC of both the attacker and target. Within two seconds of an attack, direct this at the attacker, saying “Assist” and your CR.

**Effect:** I assist your attack.

**Disarm.** You can disarm one item from someone as an attack. Say “Disarm” and your CR. Point at the item you want to disarm.

**Effect:** I disarm that item.

**Restrain.** You can restrain someone as an attack. Say “Restrain” and your CR. You may freely drag, attack, or (if you have a weapon) killing-blow them. To do anything else, or if your health state changes, incant “release” and let them go.

**Effect:** I restrain you. You are restrained until I incant “release.”

### 3.6 Stealth

Stealth abilities represent sneaking up on a victim with obvious intent to invade their personal space, probably to attack them by surprise or to pick their pocket.

To use a stealth ability, you must be within ZoC of your victim. Form the sign of the devil (index and pinky fingers extended, thumb holding other two fingers down) and extend it along the direct, unobstructed line from your shoulder to the victim’s head. Hold this position for the time specified by your ability. Before this time is up, the ability is thwarted if anyone attacks you or if the victim notices the symbol. If they react in any way to the symbol, they have noticed; you (the attacker) make the call.

If you notice someone using a stealth ability on you, make it obvious. “I notice you” is unambiguous; use it if you can. Once a stealth ability is finished, you may not retroactively have noticed.

**Waylay:** You can attack by surprise as a stealth ability. You must hold the symbol for five seconds. If you succeed, you may replace your CR with “waylay” for a single immediate attack on your victim.

### 4 Miscellaneous

**Headband Colors:** A white or yellow headband represents an observer.

**Badge Numbers:** The first digit of your badge number is your character’s apparent age in decades.

**Rope:** Rope is freely available. Make an item card for it. To tie someone up, they must be either willing or helpless. If you get tied up with rope, you become restrained. If you are conscious and left alone, you can wriggle free in five minutes.

### 5 Closing Notes

These rules are imperfect. The GMs may violate the letter of the rules to preserve the spirit. We hope these rules are reasonably clear, but if you have any doubts about your interpretation, talk it over with us in advance. We should also add, as much as we hate to admit it, we GMs are human: when all of our carefully laid plans are going haywire, we may lose our cool. The best way to deal with people is remaining calm and friendly, especially when everyone is tired and hungry.

We hope you have lots of fun. Good luck.
