

Thermodynamics qualifying exam, January 2007
Comments by Joe Smith

Reply to the GAME information request

We also encourage you to prepare a sheet with the following information (we can make copies if you provide it electronically, and post it on the GAME website):

- best classes to take to prepare for your subject area
2.005, 2.006, 2.42
- key concepts and topics addressed in your subject area
First law, second law, constitutive relations
- preparation advice
Think through and work out new problems. Do not try to memorize old solutions. Do not look at a solution until you are really stuck.
- general coaching suggestions
In the oral, relax and think through the question. Do not go too fast.
- any other recommendations you (and/or your area) have for students
