

UNIVERSITIES ARE THE BASIS FOR SUSTAINABILITY

**Build Practical Partnerships
with the development community**

A 3-Point Proposal:

Enrich curriculum and expose students and faculty to current development issues

■ ***Require all outside consultants to offer a public presentation at the university***

Provide 'hands-on' practical opportunities

■ ***Include a mechanism and budget for interns with in-country program offices of funders***

Encourage innovation and research by faculty and students

■ ***Include 1% in development program budgets from outside funders for school research***
