

Factsheet on the Iranian-American Community
Ali Mostashari
Iranian Studies Group Research Series – Updated February 2004

Estimated Population in the U.S. (Source: 2000 Census, July 2003 update)

Persons claiming primary and secondary Iranian ancestry: 338,266 *

* The Iranian-American community believes there may be serious underestimation of the actual population due to adverse perceptions of Iranian-Americans on claiming Iranian ancestry. The Iranian Studies group at MIT has estimated the average number to be 690,000 individuals.

Educational Attainment (Source: 2000 Census Data)

| | | |
|--------------------------------|-------|---|
| High School Diploma and Higher | 90.8% | (Second highest among 67 ancestry groups) |
| Bachelor's Degree or Higher | 57.2% | (Second highest among 67 ancestry groups) |
| Master's Degree of Higher | 27.5% | (Highest among 67 ancestry groups) |
