

My Heart Leaps Up When I Behold

Kayla Jacobs

March 14, 2001

My heart leaps up when I behold
An equation in science, though
It's sort of odd
That these laws of God
Should always excite me so.

But the wonder I feel, more precious than gold,
When, through mathematical toil,
What I already know
Is *proved* to be so,
Thanks to Newton, Kepler, and Boyle.
