The following are the rules for *While Nobody’s Watching*, a real-time, real-space roleplaying game sponsored by the MIT Assassins’ Guild. You are responsible for knowing these rules. Many of them are nigh-impossible to enforce and rely upon the honor system. A game is supposed to be fun. It’s no fun to win by cheating. Playing loopholes in these rules is likewise not permitted. Play fair. Be your own harshest critic.

The *gamemasters (GMs)* run the game; rulings they make are final. They promise to be as fair and reasonable as they can; neither the GMs nor these rules are perfect. If you are unsure how to proceed, if you have any doubt that what you want to do is considered fair and legal, if you are unhappy about how the game is going, or if you have any questions, contact a GM.

This is only a game. Everyone involved should act with courtesy, sportsmanship, patience, and taste. The game does not give you the right to do in reality anything normally prohibited by legality or morality. The GMs may expel anyone they believe to be violating the spirit of the rules or the game. Emotions may run high; if you think things are crossing the line from game to reality too much, or if you are just getting too stressed, calm down and maybe take a break. Stay in control. Use common sense. Always, play safely, then play to have fun.

This game is a work of fiction. Although it may refer to things in the real world, it does so only for the sake of the scenario. It is not meant to make any sort of political, social, economic, religious, philosophical, technological, governmental, revolutionary, or geographic comment and does not represent the GMs’ personal opinions. These rules are modifications of those used in previous games. This game and all materials thereof are copyright 2002 by Ken Clary, Michelle Goldberg, Charles Hope, Peter Litwack, Elizabeth Smith, Richard Tibbetts, and the MIT Assassins’ Guild.
1 Getting Started

1.1 Character Packs

Your character packet is a big manila envelope. It contains your role: who you are, what you’re up to; everything about your part as a player-character (PC) in the game. Read all the contents and generally keep them with you during the game. If you are missing something or find something which doesn’t seem to belong to you, tell one of the GMs. Character packets are confidential. Game materials which cannot be given to other players are marked “Not Transferable,” whereas things which can be given to others are marked “Freely Transferable” or “Game Item.”

**Name-Badge:** A name-badge with your player name, character description, and badge number on it shows that you are in the game; wear it visibly while you are playing. It represents your character’s body in-game. Badge numbers are not in-game information. See the Character Bodies and Badge Numbers sections for more details.

**Character Sheet:** Your character sheet describes who you are and what you are up to. It contains a list of everything else that should be in your character packet. Do not show or read your character sheet to other players.

**Bluesheets:** A bluesheet describes information common to members of a group. When in conflict, character sheet information overrides bluesheet information. Do not show or read a bluesheet to other players.

**Greensheets:** A greensheet describes and expands abilities, mechanics, or in-game knowledge. Do not show or read a greensheet to other players.

**Stat Card:** Your stat card lists your statistics. You might not know what all of your stats mean. Do not show your stats to others. The reverse side is a death report; fill it out and give it to the GMs when your character dies.

**Ability Cards:** An ability card explains a special ability your character has. The front side describes the effects; show it to players when you use the ability. The reverse is the rules of use and must not be shown to other players.

**Memory Packets:** A memory packet is an envelope or stapled piece of paper with a trigger which describes when to open and read it. If the trigger is a number, open the packet when you see something with that number. If it’s a quoted phrase, open when you hear or read it in-game. If it’s a symbol, open when instructed. Do not take game action based on an unopened trigger. Do not show or read a memory packet to other players.

**Items:** In-game items may be transferred from character to character, and should be marked as such. See the Items Etc. section for more details.

**Scenario:** A scenario gives you general knowledge of the game and its setting.
1.2 Reality and Game Reality

There is a big difference between reality and game reality. Players must treat each other with courtesy and explain to each other what their characters perceive in confusing situations; e.g. “My character’s hands are covered in blood,” an out-of-game statement. Characters are under no such restrictions, and may do what it takes to further their goals; e.g. “Uh, hi Bob. Just got back from the butcher shop,” an in-game statement.

Metagaming is inferring in-game knowledge that is inappropriate for your character from out-of-game information. Do your best to not metagame and to prevent the risk of metagaming. Be your own harshest critic.

Halts: A halt pauses game action. To call one, say “game halt” in a clear and audible voice; other players around a corner should hear you, but you shouldn’t scare some poor grad student. End a halt by saying “three, two, one, resume.” Call a halt for one of only three reasons: because a rule instructs you to, for safety and similar out-of-game issues, or to pause game and fetch a GM (which you should avoid).

Not-Here: You may go not-here by turning your name-badge around so the “I’mNot Here” side is showing (or by removing your badge entirely, if you are leaving game). Putting a hand on your head, visible from a distance, helps if you’re near other players. Go not-here for one of only three reasons: because a rule instructs you to, to leave game, or to fetch a GM while in a halt (which you should avoid).

When you are not-here, your character is not there. Your character cannot see, hear, or remember any game actions or information you (the player) happen to encounter. Avoid other characters, common game areas, game signs, or any sort of game interaction. To leave or enter game for the night/day/whatever, walk to somewhere public. Don’t go not-here in front of other characters; give them a fair chance to interact with (ambush) you.

Non-Players: Not everyone in the world is playing in this game. Some non-players (NPs) like to sleep or study undisturbed; others just don’t like having toy guns waved in their faces. You are encouraged to spread the gospel of real-time, real-space roleplaying; however, use tact and common sense when dealing with NPs.

NPs may not knowingly affect the game. They may not be used to hold items or information, nor can anything be hidden in a NP’s room. They may not help you kill someone, much less blow up a bomb for you. Do not use the presence of NPs to hide from rampaging mobs that want your blood.

Avoid conspicuous or threatening game actions in front of NPs. Shooting your friend outside of a classroom one minute before class lets out is a bad idea, as is screaming bloody murder down a hallway. If, despite your most valiant efforts, some NPs do get upset, call the GMs who will help calm them down.

Player Rooms: Players may retreat to their rooms to study, sleep, or whatever in safety. Your character may not enter a player’s room unless invited in-game. This has traditionally been called the “jhereg rule.” Do not use your room as an impenetrable meeting place or stash site. If your character is in-game in your room, other characters may interact with (kill, torture) you. Roommates and similar are considered to have separate rooms for this rule.

Observers: An observer is someone not playing the game who has agreed to watch. They generally wear an observer headband or an observer name-badge. Observers have traditionally been called “ghosts.” They should stay out of the way; you can always ask an observer to leave. If a friend who is not playing wants to observe game, send them to the GMs.

Non-Player-Characters: Non-player-characters (NPCs) are characters in the game’s universe not played by a full-time player. They are minor characters, bit parts, or random people. Some may have name-badges; sometimes called “GM plants,” these are often not readily distinguishable from PCs.
Mechanics: Many actions your character can take, such as walking, talking, and general interaction with other characters, are represented by you doing them. Some things, like combat, are performed via abstract mechanics, which are described in ability cards, greensheets, and rules. The abstract information for mechanics (like badge numbers) may not be discussed in-game. If you want to do something special for which there is no mechanic, ask a GM.

Become familiar with your mechanics before game starts, especially for those which occur under time-pressure (including combat). Game action will not stop for memory packets, greensheets, or such.

A kludge (and derivative forms like “kludge-ite”) is something impervious to logic and cleverness, usually for game-balance. You can’t affect a kludge without a specified mechanic.

Zone of Control (ZoC) is a rough distance measurement. You are within ZoC of someone if your outstretched fingers can touch their outstretched fingers. Double-ZoC is twice this distance, triple-ZoC is three times, etc.

Headbands represent obvious visual effects; wear them visibly on your head. If you see a headband and don’t know what it represents, ask. If you are wearing a headband, tell people what their characters see.

Safety: This is a game. Real violence is unacceptable. Game action should cause no real-world damage, either to people or property. If something dangerous is happening, call a halt. Stay in control, use common sense, and do not endanger yourself or others. You should not run or otherwise force your way into or through someone else’s ZoC, and you should never make physical contact with another player without permission.

1.3 Basic Strategy

Your first priority as a player is to make sure you understand the rules. If you are completely confused, get a GM who will try to help you out. Second, make sure you know enough about your character to role-play him or her when you start talking to other people. Read through your entire packet a couple of times, and skim through it again right before game starts. If there is something about your character you don’t know, ask a GM.

As a character, your first priority should be to open lines of communication. Contact people, show up at meetings, and chat. Try to be easy to get in touch with. Ask people questions on relevant subjects. They’ll probably lie, but you just might find something out.

There are no guarantees that you can trust anyone, but since cooperation is the key to accomplishing things, you will be forced to trust people anyway. The most trustworthy people are probably those who need you.
2 Items Etc.

Many in-game items are represented by little white cards with a number and description. Item cards may be shown to others, passed around, stolen, etc. The item number on the card is not in-game information and may not be discussed. Not all in-game items have cards or numbers; whatever they are represented by should be clearly marked “in-game item” or “freely transferable.” Use common sense. You can’t carry a hundred rocks in your pocket, fold a sword in half, or hide a life-sized statue in a fire hose. You can’t stop a bullet with a set of blueprints or rip apart a metal safe with your bare hands. Even if your bag can carry a shovel in it, the shovel noticeably sticks out (“you see a shovel sticking out of my bag”).

Written Information: If you write in-game information down on a piece of paper, that paper is now an in-game item and must be clearly marked as such. Don’t write in-game information on out-of-game documents (character sheet, etc.). Don’t write out-of-game information (like memory packet triggers) on in-game documents.

Envelopes: Some items and locations may have an attached envelope (or just be a labeled packet or folded paper). The envelope may include directions for when to open these (“open packet if you press the big red button” or “open packet if you eat this”); otherwise you may only open them if instructed.

Signs: Some locations and other game materials are represented by signs or packets posted throughout game area. You may read any signs and must follow any rules printed on them. If a sign or packet doesn’t have some sort of in-game description (it only has out-of-game mechanics information, like a number or just a colored dot), then your character doesn’t even see it or know that anything unusual is there.

Bulkiness: A bulky item is too big or heavy to be carried or concealed freely. Bulkiness is measured in hands or dots (how many hands it takes to carry it). If you are carrying a bulky item, make it clear to onlookers (hold the card). A hand carrying a bulky object may do nothing else. With one hand less than required, you may drag a bulky item at a slow pace.

Props: Some items may have props (physical representations or physreps) associated with them. The card and physrep should be kept together. If they are separated, the card is the real item. Prop items are as bulky as the physrep. They can be carried in bags that can hold them, on straps that are attached to them, etc.

Containers: Some items, like crates or personal bags, have a capacity. Capacity is measured in dots or hands; this is how many dots of items can be stored within. You can put as many non-bulky items inside as is within reason. A container may have a capacity bigger than its bulkiness; use common sense when nesting containers. Put contained item cards inside the envelope attached to the container card.

Character Bodies: A body is two hands bulky and usually represented by a name-badge. It must be willing or unable to resist for you to carry it. Carry the badge conspicuously. Onlookers can’t tell if it’s dead without close examination, unless it would be obvious (like headless).
2.1 Searching, Stashing, and Stealing

**Places:** To search a place, search it. Normal items can be stashed in any reasonable, legal place. Don’t put items behind locked doors, inside ceilings, in construction sites, or in hacking locations; consequently, don’t go rummaging through such places for game items. Don’t stash or search in places that are not in-game; see the Game Areas section for more information.

**People:** All searches of characters or their belongings are conducted via player dialogue. Someone must be willing or unable to resist for you to search them. You need at least one free hand to search someone. Anyone within ZoC of either you or your victim can prevent the search by saying “I stop you” or an equivalent phrase.

You can perform a **pat-down search**, which will only reveal the presence of weapons. This takes as much time as it takes your victim to tell you what you find. If you’re the victim, do this at a reasonable pace.

A **total search** is an invasive, complete search of a character’s clothing. This reveals all in-game items, and takes as long as your victim spends handing over possessions. If you’re the victim, hand over items at a reasonable pace.

**Bags:** To search a bag that is obviously in-game (has an attached, displayed item card), search the physrep. Item cards in the bag must be in reasonable places. If the item card has a capacity and an envelope, the bag is just a prop and all in-game items should be in the packet.

To search a bag that is not obviously in-game (no visible item card attached), spend thirty seconds by the bag, put a “searched (see a GM)” note on the bag, and come tell a GM. Tell any onlookers that they see you searching through the bag. Search an attended bag via player dialog with the owner; they must be willing or unable to resist. If someone searches a bag you are holding, hand over all game items inside at a reasonable pace.

If you find a “searched” note on your bag, come see a GM. To declare a bag out-of-game, label it “no game items.”
3 Violence, Damage, and Death

3.1 Health States

Characters have five possible states, concerning health and damage. When you are fine, you may act freely. When you are helpless, you are immobile and may do nothing but talk. When you are knocked out, you will wake up in five minutes. When you are wounded, you are unconscious, bleeding, and will die in five minutes. When dead, you are dead.

When knocked out or wounded, fall down and drop anything you are holding. Just lie there. You won’t be doing much of anything until you wake up. Do not listen to conversations going on.

Dead men tell no tales. If dead, do not give out any information about your character or death to any players. You may remain on the scene to play the part of your corpse; describe obvious information to onlookers (“I have a gunshot wound in my back”). When you leave, place the front of your name-badge with a description of the body’s obvious state. Take the “I’m Not Here” side to wear. Stack your items with your body. Fill out your Death Report. Make sure the GMs know about your death. If your death becomes generally known to the other characters, you may be able to become an observer. Until the game is over, you may not convey game information to any player.

3.2 Weapons

All weapons have both a physrep and an item card; keep these together. Weapon effects are on the card. To use a weapon, you must have it in your hand and unobstructed. Display it in an obvious manner. You cannot hold more than one weapon in a hand. You may only use one melee weapon at a time.

3.3 Killing Blow

A killing blow will kill a helpless victim. Your victim must be within ZoC and either unconscious or helpless. You must use a weapon (melee or ranged). Clearly incant “killing blow one, killing blow two, killing blow three” at a reasonable pace. During the incant, if you are attacked or if someone within ZoC says “I stop you” or an equivalent phrase, you are stopped. To stop a killing blow, either attack the person doing it or say “I stop you” within ZoC.

3.4 Ranged Combat

Ranged combat is real-time and mostly based upon player skill at firing and dodging physreps. Keep it safe. Hits to anywhere on the body count the same; don’t aim for the head. If a projectile hits clothing or long hair such that it would not hit the body when passing through, it doesn’t count. Hits to an item you hold count as a hits on you, not the item. If there is a conflict over whether or not a projectile hit, the shooter calls the shot.

All ranged projectiles have the same effect: if and when you are hit by one, you become wounded. There are two types of ranged projectiles: bullets and throwing knives. Bullets, represented by either plastic discs, plastic darts, foam darts, or koosh rings, can be fired by various types of guns. Ammo is unlimited. A throwing knife is physrep’ed by a small foam knife. Throwing a knife to do damage requires an ability.

3.5 Contact Poison

Contact poison is physrep’ed by vasoline. If contact poison touches your skin, you die in five seconds. An unused dose of contact poison will have an item card. It may only be applied to physrep’ed game items. It may not be applied to clothing. Do not apply it in a way that would damage the prop. Once applied, it may not be reused; second-hand contact poison does not work. You may not make a player touch contact poison; the victim must willingly touch the poisoned item. You may make a helpless character touch contact poison as a killing-blow.
3.6 Martial Combat

All characters have a **Combat Rating (CR)** stat. This represents your basic skill in martial combat; you use the same number for attacking and defending. Someone with a CR of one can’t fight very well. Someone with a CR of three is somewhat burly or skilled. When using this stat, you may pull your punches by using a lower number.

To martial-attack someone, clearly state your attack followed by your CR (“Knock Out 2” or “Wound 2”) from within ZoC. You must have the ability card for any attack you make; you don’t need to display it. Your attack must resolve before you may make another. If an ally directs **Assist** at you after you attack, you may, within 2 seconds, restate your attack with the Assist’s CR added (“Wound 3”, “Assist 2”, “Wound 5”). Assist does not change your CR for defense. You may always ignore an Assist.

When attacked, resolve by comparing the attack against your CR. If your CR is lower, take the effects; else, say “**resist**” and the attack has no effect. If you neither say “resist” nor counterattack within two seconds of the incant’s end, you are surprised and the attack just works. The attack begins when the incant begins; until you resolve, all of your actions other than attacks are interrupted; serial attacks don’t prevent simple actions (talking, weapon-drawing, ranged attacks) in-between. Resolve all attacks alone, in the order they occur; choose the order if it is unclear. If someone attacks with the word “**waylay**” instead of a CR (“Knock Out waylay”), the attack just works.

**Martial Attack Abilities:**

Here is a list of attack abilities. Everyone has Knock Out, Wound, and Assist. Only some people will have Disarm and Restrain. Other attack abilities may exist.

- **Knock Out**: You can knock someone out as an attack. This requires a blunt weapon. Say “Knock Out” and your CR.
  
  *Effect*: I knock you out.

- **Wound**: You can wound someone as an attack. This requires an edged weapon, such as a knife. Say “Wound” and your CR.
  
  *Effect*: I wound you.

- **Assist**: You can assist someone else’s attack. You must be within ZoC of both the attacker and target. Within two seconds of an attack, direct this at the attacker, saying “Assist” and your CR.
  
  *Effect*: I assist your attack.

- **Disarm**: You can disarm one item from someone as an attack. Say “Disarm” and your CR. Point at the item you want to disarm. If the attack works, they must drop that item.
  
  *Effect*: I disarm that item.

- **Restrain**: You can restrain someone as an attack. Say “Restrain” and your CR. If you succeed, they are helpless. You may freely drag, attack, or (if you have a weapon) killing-blow them. To do anything else, or if your health state changes, incant “release” and let them go.
  
  *Effect*: I restrain you. You are helpless until I incant “release.”

3.7 Stealth

Stealth abilities represent sneaking up on a victim with obvious intent to invade their personal space, probably to attack them by surprise or to pick their pocket.

To use a stealth ability, you must be within ZoC of your victim. Form the sign of the devil (index and pinky fingers extended, thumb holding other two fingers down) and extend it along the direct, unobstructed line from your shoulder to the victim’s head. Hold this position for the time specified by your ability. Before this time is up, the ability is thwarted if anyone attacks you or if the victim notices the symbol. If they react in any way to the symbol, they have noticed; you (the attacker) make the call.

If you notice someone using a stealth ability on you, make it obvious. “I notice you” is unambiguous; use it if you can. Once a stealth ability is finished, you may not retroactively have noticed.

- **Waylay**: You can attack by surprise as a stealth ability. You must hold the symbol for five seconds. If you succeed, you may replace your CR with “waylay” for a single immediate attack on your victim.
4 Miscellaneous

Headband Colors and Badge Numbers: A white or yellow headband represents an observer. The first digit of your badge number is your character’s apparent age in decades.

Electronic Communication: You may use email, zephyr, phones, pagers, PDAs, HAM radios, and other forms of electronic communication freely for game purposes. You may not violate any rules of use of these devices (no packet sniffing, wiretapping, etc.). Family Band radios and Family Bands 1–9 are reserved for GM use only. If you have temporary need of a radio, the GMs may lend you a Family Band radio.

Money: You have an electronic bank account that only you can access; the security is a kludge. At any building intersection or your room, or via any electronic means, you may freely create cash-cards, freely transfer money between your account and a cash-card, or freely transfer money to someone else’s account (with the recipient’s permission). Write the value of a cash-card on the item. Anyone can trade or spend money off a cash-card.

Rope: Rope is freely available; make an item card for it. To tie someone up, they must be willing, helpless, or unconscious. If you get tied up with rope, you become helpless. If you are conscious and left alone, you can wriggle free in five minutes.

Game Times and Areas: Game runs from 8pm on Friday, September 20 to 2am on Sunday, September 29. Game break is from Tuesday 6am to Wednesday 6pm; for mechanics purposes, twelve hours of game pass. Game may end early. Cleanup will immediately follow the end of game. Wrapup will occur at noon on Sunday.

Downtime is time spent when you are awake but not actively in-game. Game break can be used as twelve hours of downtime.

Most publicly-accessible areas on campus are considered in-game (your character can move about freely in them). As usual, avoid places it is illegal for you to go, areas under construction, etc. Don’t take game actions in bathrooms, private offices, activity offices, and other places not all players would be allowed to enter.

When in living areas, such as dorms, remember the Player Rooms section. Many living areas on campus are not technically accessible to all players. Whether or not to take game action in your living area is left to player judgment.

There are some areas on campus that are not publicly in-game. You may not enter them in-character unless explicitly instructed to; if you happen to be in them your character is not there. These areas are: all basements and floors five and higher of main campus buildings. If you are directed to them, you may not change buildings or floors without being directed out.

Secure Areas: You may find yourself inside a secure area. When in a secure area, you need to keep track of a security timer. The security timer starts counting down from twenty-five minutes once you enter. When it reaches zero, you are caught; follow the instructions on the sign at which you entered. If you enter a secure area and find people already inside, use their timer.

In a secure area, you may come across an alarm, represented by a sign. If you have gone farther than arm’s reach past an alarm, you have walked past it. You can circumvent an alarm when walking past it by reading and touching the sign; you must also fulfill any listed requirements. If you discover you have walked past an alarm without circumvention, you trip it: remove five minutes from the timer. The same alarm can be tripped multiple times by different people. An easy way to keep track of the timer is to write down the time it will expire, and change it as appropriate.

5 Closing Notes

These rules are imperfect. The GMs may violate the letter of the rules in order to preserve the spirit. We hope these rules are reasonably clear, but if you have any doubts about your interpretation, talk it over with us in advance. We should also add, as much as we hate to admit it, we GMs are human: when all of our carefully laid plans are going haywire, we may lose our cool. Remember, the best way to deal with people is by remaining calm and friendly, especially when everyone is tired and hungry.

We hope you have lots of fun. Good luck.
