The Wonders of Boba

What is Boba? Boba, also known as black pearls or tapioca balls, is derived from the starch of the cassava root. When cooked perfectly, the Boba becomes a sweet, chewy ball with a jelly-like texture about 6mm in diameter. At first glance, you see a layer of dark, round balls at the bottom of your cup. As you sip your drink, these “mysterious marbles” travel up the specially wide straw. The texture, taste and chewy sensation makes you want more!

Unlike other generic Boba places, Lollipops’ Boba is made from the finest ingredients and packed air tight for freshness. Adding these perfectly cooked Boba to tea, coffee, slushes, and other fruit drinks is Lollipops’ expertise! In addition, Lollipops infuses the world with new wonders by introducing the famous miniature Boba (about 2mm wide) and rainbow colored Boba.

Don’t hold back - it’s time to explore the wonders of Boba at Lollipops!

The Magic of Green Tea

To many people, Green Tea is an aphrodisiac - a mystical wonder that refreshes the body with nature’s richest essence. Green Tea is known to be most powerful on the central nervous system, heart and liver as it stimulates and awakens the mind. The natural caffeine in a regular serving of green tea is also known to stimulate skeletal muscles. Many people love the energy that surges through their body and mind by drinking green tea on a daily basis.

Lollipops heightens the enjoyment of green tea by serving a variety of unique and flavorful green tea drinks with fruit syrups. We only select quality green tea leaves and brew them daily for a smooth and aromatic taste. These leaves are also ground into powder to create the invigorating Matcha green tea slush.

Unlike any other tea drink provider, Lollipops continues to perfect the raw ingredient of green tea and create new drink sensations for you.
