

**Program Manager: Low Carbon Fuels  
International Council on Clean Transportation  
Washington DC**

The International Council on Clean Transportation (ICCT) is seeking a manager for its developing program of activities in low carbon fuels and biofuels. The primary focus of this new position will be to work with government officials, stakeholder groups, consultants, and academics from the United States, Europe, Canada, and elsewhere to develop state, national, and international policies and regulations that reduce greenhouse gases from transportation fuels while ensuring the sustainability of alternative supplies.

The position will have both deep technical and policy content. Policy tasks will include educating policymakers, regulators, and stakeholders on the strengths and weaknesses of low carbon fuels and biofuels policies, facilitating communication and collaboration within and among these groups, and helping develop practically and politically feasible solutions to policy barriers. Technical tasks will include reviewing and evaluating certification protocols for biofuels and all transportation fuels, evaluating, comparing and modifying lifecycle fuel models, and assisting in the development of a series of policy-relevant technical papers. The position will serve as a clearinghouse for information and expertise regarding lifecycle assessment, sustainability certification, and policy structure and regulatory implementation, and will involve coordinating information sharing among experts around the world.

The position incumbent may also have opportunity to engage in other projects under the ICCT's charge, including reducing emissions from international marine transportation, heavy-duty truck emission standards, and greenhouse gas and fuel economy standards for light and heavy-duty vehicles.

Qualifications: Demonstrated experience and leadership in biofuels (or other low carbon fuels) science and/or policy. Knowledge of lifecycle GHG accounting. Experience with regulatory policy. International experience and language proficiency desired. Work experience on transportation or air quality issues is a plus. Strong quantitative, analytic, research and writing skills as well as the ability to accurately and concisely summarize complex information for a broad range of audiences. Master's degree in engineering, public policy, economics or a related field desired.

Job details: Salary will be competitive and commensurate with experience and a generous benefits package is provided. The position is located in Washington DC.

Resume, cover letter summarizing your interests and qualifications, a writing sample (no more than 25 pages), name and contact information of three references (letters not necessary), and salary expectations to: Drew Kodjak, Executive Director, International Council on Clean Transportation, 1250 Eye Street, NW, Suite 350, Washington, DC 20005. E-mail: [Drew@theicct.org](mailto:Drew@theicct.org).

## **About the International Council on Clean Transportation**

The International Council on Clean Transportation (ICCT) is a nonprofit organization whose purpose is to dramatically reduce conventional pollutant and greenhouse gas emissions from personal, public and goods transportation in order to improve air quality and human health, and mitigate climate change. The Council is made up of leading government regulators and experts from around the world that participate as individuals based on their experience with air quality and transportation issues. The ICCT promotes best practices and comprehensive solutions to improve vehicle emissions and efficiency, increase fuel quality and sustainability of alternative fuels, reduce pollution from the in-use fleet, and curtail emissions from international goods movement. For more information, visit [www.theicct.org](http://www.theicct.org).
