Cambridge, MA – MIT Museum Announces Installation

COLLISIONbox #2: Cars and Stars

January 20 - April 30, 2006

Opening reception: January 21, 2006, 5:30-7:30pm

Andy Zimmermann's multi-media installation, "Cars and Stars," projects digital animation and video onto a three-dimensional sculpture, with accompanying digital sound composition. He describes it as "a song cycle; a meditation on the circadian rhythm of traffic jams." The *COLLISIONbox* exhibit series features members of the MIT Collision Collective - a group of MIT and Boston-based artists exploring new technologies.

Project collaborator: MIT Collision Collective
