

**MIT** m u s e u m

presents

# Soap Box:

**TUESDAY Mar 21, 6:00 – 8:00 PM**

a salon-style conversation with

**Professor Andrew Endy,**  
Cabot Assistant Professor  
of Biological Engineering  
who will talk about **Synthetic  
Biology.**

Synthetic biology is the ultimate  
in biological engineering - using  
designed and engineered DNA  
to build organisms from scratch.  
But will it be misused? How do  
we regulate such work? Endy will  
discuss the potential of synthetic  
biology and its ethical, societal and  
environmental implications.

**Debating  
Cutting Edge  
Issues with  
World-Class  
Scientists  
and Engineers**

at the  
**MIT** m u s e u m  
in conjunction with  
*The Boston Globe*

Free Admission, Seating Limited  
Refreshments served
