Contents

**Proceedings of the 18th International Conference on the
Numerical Simulation of Plasmas
Falmouth, USA, September 7–10, 2003**

Editors: Oleg V. Batishchev, Richard D. Sydora

Preface	xi
In remembrance of John Dawson	xii
2003 John Dawson Prize winners for “ <i>pioneering advances to plasma physics obtained through simulations</i> ”	xiv
Remarks by Charles K. (Ned) Birdsall regarding the Dawson Prize	xvi
Remarks by Bruce Langdon regarding the Dawson Prize	xix
2003 Oscar Buneman Award winners	xxi
2003 Best Graduate Student Presentation Award winners	xxiii
Contents	xxv
M. Greenwald	
Beyond benchmarking—how experiments and simulations can work together in plasma physics	1
R. Schneider, X. Bonnin, N. McTaggart, A. Runov, M. Borchardt, J. Riemann, A. Mutzke, K. Matyash, H. Leyh, M. Warrier, D. Coster, W. Eckstein and R. Dohmen	
Comprehensive suite of codes for plasma-edge modelling	9
R. Horiuchi, H. Ohtani and A. Ishizawa	
Structure formation and dynamical behavior of kinetic plasmas controlled by magnetic reconnection	17
D. Grasso, D. Borgogno, F. Califano, D. Farina, F. Pegoraro and F. Porcelli	
Numerical solution of a reduced model of collisionless magnetic reconnection in two and three dimensions	23

J. Egedal, W. Fox, E. Belonohy and M. Porkolab Kinetic simulation of the VTF magnetic reconnection experiment	29
S.E. Kruger, C.R. Sovinec, D.D. Schnack and E.D. Held Free-boundary simulations of DIII-D plasmas with the NIMROD code	34
H.R. Strauss, A. Pletzer, W. Park, S. Jardin, J. Breslau and L. Sugiyama MHD simulations with resistive wall and magnetic separatrix	40
A.A. Balakin and G.M. Fraiman Numerical simulations of electron–ion collisions in UHI plasmas	46
O.V. Batishchev, A.A. Batishcheva, V.Yu. Bychenkov, C.M. Albukrek, A.V. Brantov and W. Rozmus Molecular dynamics model for heating of Coulomb clusters by laser field	53
F. Alouani-Bibi, M.M. Shoucri and J.-P. Matte Different Fokker–Planck approaches to simulate electron transport in plasmas	60
A.V. Brantov, V.Yu. Bychenkov, O.V. Batishchev and W. Rozmus Nonlocal heat wave propagation due to skin layer plasma heating by short laser pulses	67
S. Cheng, M. Santi, M. Celik, M. Martinez-Sanchez and J. Peraire Hybrid PIC-DSMC simulation of a Hall thruster plume on unstructured grids	73
V.K. Decyk and C.D. Norton UCLA Parallel PIC Framework	80
E. Hajiyev and A. Demir A collisional-radiative model for simulation of Ne-like and F-like resonance lines emitted from laser produced plasmas	86
Y.A. Kholodov, A.S. Kholodov, E.L. Stupitzki and A.Y. Repin Numerical simulation of the convective plasma dynamics stage at the ionosphere motion by means of 3D MHD equations	91
J.C. Kniep, J.-N.G. Leboeuf and V.K. Decyk Gyrokinetic particle-in-cell calculations of ion temperature gradient driven turbulence with parallel nonlinearity and strong flow corrections	98
V.B. Krasovitskii, V.G. Dorofeenko, V.I. Sotnikov and B.S. Bauer Nonlinear processes during the interaction of a petawatt laser pulse with a plasma in the presence of an external magnetic field	103
A.H. Kritz, G. Bateman, J. Kinsey, A. Pankin, T. Onjun, A. Redd, D. McCune, C. Ludescher, A. Pletzer, R. Andre, L. Zakharov, L. Lodestro, L.D. Pearlstein, R. Jong, W. Houlberg, P. Strand, J. Wiley, P. Valanju, H.St. John, R. Waltz, J. Mandrekas, T.K. Mau, J. Carlsson and B. Braams The National Transport Code Collaboration Module Library	108
J.L.V. Lewandowski Characterization of strange attractors in drift wave microturbulence	114
P. Messmer and D.L. Bruhwiler A parallel electrostatic solver for the VORPAL code	118

D.L. Newman, M.V. Goldman, R.E. Ergun, L. Andersson and N. Sen Reduced Vlasov simulations in higher dimensions	122
J.A. Rossmannith A high-resolution constrained transport method with adaptive mesh refinement for ideal MHD	128
S. Shasharina, R. Eger and J. Cary Data grid for fusion simulations and experiments	134
M. Shoucri, H. Gerhauser and K.-H. Finken Study of the generation of a charge separation and electric field at a plasma edge using Eulerian Vlasov codes in cylindrical geometry	138
V.I. Sotnikov, B.S. Bauer, J.N. Leboeuf, P. Hellinger, P. Trávníček and V. Fiala Hybrid simulations of Z-pinchs	150
D.J. Strozzi, M.M. Shoucri and A. Bers Study of laser plasma interactions using an Eulerian Vlasov code	156
F. Taccogna, S. Longo, M. Capitelli and R. Schneider Stationary plasma thruster simulation	160
J.-L. Vay, J.-C. Adam and A. Héron Asymmetric PML for the absorption of waves. Application to mesh refinement in electromagnetic Particle-In-Cell plasma simulations	171
W.X. Wang, W.M. Tang, F.L. Hinton, L.E. Zakharov, R.B. White and J. Manickam Global δf particle simulation of neoclassical transport and ambipolar electric field in general geometry	178
D.R. Welch, D.V. Rose, R.E. Clark, T.C. Genoni and T.P. Hughes Implementation of a non-iterative implicit electromagnetic field solver for dense plasma simulation	183
Plasma Theory and Simulation Group (PTSG), C.K. Birdsall and E.T. Estacio Discoveries in plasmas while teaching simulation	189
V. Kolobov and R. Arslanbekov Four dimensional Fokker–Planck solver for electron kinetics in collisional gas discharge plasmas	195
J. Carretero and M. Martínez-Sánchez Numerical simulation of a colloidal thruster in the droplet regime	202
S. Vadlamani, S.E. Parker, Y. Chen and C. Kim The particle-continuum method: an algorithmic unification of particle-in-cell and continuum methods	209
M. Gutnic, M. Haefele, I. Paun and E. Sonnendrücker Vlasov simulations on an adaptive phase-space grid	214
R. Samtaney, S.C. Jardin, P. Colella and D.F. Martin 3D adaptive mesh refinement simulations of pellet injection in tokamaks	220
T. Matsumoto, M.N. Machida, K. Tomisaka and T. Hanawa Self-gravitational collapse of a magnetized cloud core: high resolution simulations with three-dimensional MHD nested grid	229

A.H. Glasser and X.Z. Tang The SEL macroscopic modeling code	237
W.W. Lee Theoretical and numerical properties of a gyrokinetic plasma: issues related to transport time scale simulation	244
A.V. Ilin, F.R. Chang Díaz, J.P. Squire, A.G. Tarditi and M.D. Carter Improved simulation of the ICRF waves in the VASIMR plasma	251
E.L. Stupitsky, A.S. Kholodov, A.Y. Repin and Y.A. Kholodov Numerical modeling of behavior of high-energy plasmoid in upper ionosphere	258
G. Manfredi and F. Valsaque Vlasov simulations of plasma-wall interactions in a weakly collisional plasma	262
T. Taguchi, T.M. Antonsen Jr. and K. Mima Study of hot electron beam transport in high density plasma using 3D hybrid-Darwin code	269
J. Tonge, D.E. Dauger and V.K. Decyk Two-dimensional semiclassical Particle-In-Cell code for simulation of quantum plasmas	279
H. Lütjens Toroidal simulations of nonlinear thresholds and saturations of classical and neoclassical tearing instabilities	286
R. Numata, Z. Yoshida and T. Hayashi Nonlinear three-dimensional simulation for self-organization and flow generation in two-fluid plasmas	291
J.-L. Vay, P. Colella, A. Friedman, D.P. Grote, P. McCorquodale and D.B. Serafini Implementations of mesh refinement schemes for Particle-In-Cell plasma simulations	297
A.J. Christlieb, R. Krasny and J.P. Verboncoeur A treecode algorithm for simulating electron dynamics in a Penning–Malmberg trap	306
K.J. Bowers, B.G. Devolder, L. Yin and T.J.T. Kwan A maximum likelihood method for linking particle-in-cell and Monte-Carlo transport simulations	311
N. McTaggart, R. Zagórski, X. Bonnin, A. Runov and R. Schneider Finite difference scheme for solving general 3D convection–diffusion equation	318
J.C. Wright, P.T. Bonoli, E. D’Azevedo and M. Brambilla Ultra-high resolution simulations of mode converted ion cyclotron waves and lower hybrid waves	330
A. Wheelock, D.L. Cooke and N.A. Gatsonis Investigation of ion beam neutralization processes with 2D and 3D PIC simulations	336
J.P. Verboncoeur Aliasing of electromagnetic fields in stair step boundaries	344
A.G. Korsun, E.M. Tverdokhlebova and F.F. Gabdullin Simulation of plasma plume-to-spacecraft interaction	353
I. Szcześniak and J.R. Cary dxhdf5: A software package for importing HDF5 physics data into OpenDX	365

D.W. Swift	
Use of a hybrid code for global-scale simulation of the Earth's magnetosphere	370
F. Subba and R. Zanino	
Modeling plasma-wall interactions in First Wall-Limiter geometry	377
A. Spirkin and N.A. Gatsonis	
Unstructured 3D PIC simulations of the flow in a retarding potential analyzer	383
E. Sonnendrücker, F. Filbet, A. Friedman, E. Oudet and J.-L. Vay	
Vlasov simulations of beams with a moving grid	390
M. Shoucri	
The application of a fractional steps method for the numerical solution of the shallow water equations	396
S. Shasharina, R. Eger and J. Cary	
FarSight: application for remote visualization	402
A.C. Robinson and C.J. Garasi	
Three-dimensional z-pinch wire array modeling with ALEGRA-HEDP	408
K. Peterson	
Self consistent impedance determination in multiple circuit paths for resistive magnetohydrodynamic z-pinch flux compression simulations	414
A. Pankin, G. Bateman, R. Budny, A. Kritz, D. McCune, A. Polevoi and I. Voitsekhovitch	
Numerical techniques used in Neutral Beam Injection modules	421
K. Nanbu and L. Tong	
Solution method of the Poisson equation for the electric field with a thin sheath	428
A.G. Korsun, E.M. Tverdokhlebova and F.F. Gabdullin	
Mathematical model of hypersonic plasma flows expanding in vacuum	434
J.W. Koo and I.D. Boyd	
Computational model of a Hall thruster	442
Ch.C. Kim, C.R. Sovinec, S.E. Parker and The NIMROD Team	
Hybrid kinetic-MHD simulations in general geometry	448
S. Ethier and Z. Lin	
Porting the 3D gyrokinetic particle-in-cell code GTC to the NEC SX-6 vector architecture: perspectives and challenges	456
V.Yu. Bychenkov, G.I. Dudnikova and V.A. Vshivkov	
Computer simulation of particle acceleration in thin foil by ultrashort laser pulses	459
D.A. Dimitrov, R. Busby, J. Exby, D.L. Bruhwiler and J.R. Cary	
Secure web-based invocation of large-scale plasma simulation codes	464
J. Chen, J. Breslau, G. Fu, S. Jardin and W. Park	
Symmetric solution in M3D	468

D. Subbarao, K. Batra, M. Bali and S. Mitra Computer simulation of cylindrical laser beam self-focusing in a plasma	472
D. Subbarao, M. Arora, R. Uma, M.V.R. Phanendra and K.K. Singh Computer simulation of gyrophase self-organisation in a magnetoplasma	477
Author index	483
