

Who Processes A Change/Corrected Application

Coeus Team with no DLC involvement:

- Coeus technical issues
- Grants.gov errors (system-generated; usually after discussion with Grants.gov help desk)
- PI is not 'affiliated' with MIT
- Minor changes to text field that is available in 'data override' (for example grant number is in wrong format CA-15051 instead of CA14051)

DLC with Coeus Team support:

- Necessary to make corrections to address errors or serious warnings (would require manipulation of budget, narrative attachments, etc)
- Proposal has been received by the agency with warnings and PI determines a change/corrected is necessary or preferred
