

Women in Physics Mentoring Program - Application Form 2004-2005

1. NAME: _____

2. EMAIL: _____

3. YEAR (circle one): Senior Junior Sophomore Frosh

4. Help us get a little sense of what kind of person you are... List a few of your favorite hobbies or extracurricular activities, or describe what kinds of things you do for fun.

5. What in particular are you hoping to get out of this mentoring program?

6a. If you would like, we can try to match you with a grad student who studies a particular sub-field of physics. You can skip this question if you don't care, but otherwise rank your top several choices (1=highest)

Experimental physics in general

Theoretical physics in general

Atomic physics (ie, laser spectroscopy, cold atoms, Bose-Einstein condensates)

Condensed matter physics (ie, statistical physics, ab-initio calculations)

Biophysics/medical physics (ie, Health Science and Technology program)

Astrophysics (ie, cosmology, observational astronomy, gravitational waves)

Experimental particle physics (ie, particle accelerators, building detectors)

Theoretical particle physics (ie, string theory, quantum field theory)

Physics teaching

Other: _____ (we' ll try to find the closest match)

6b. How important is it to you to have a mentor in the area you specified above?

- Very important to get the field I ranked as number 1**
- Very important to get one of my top few choices**
- It would be nice, but I'm happy with a mentor in any field of physics**
- I don't really care all that much**

7. If you have any other requests that you would like us to take into account when matching you with a mentor, please elaborate below. (For example, that you're particularly like an international student, or someone who took time off before starting grad school, or someone who is a vegan too, etc.) It's fine to leave this blank.

IF YOU HAD A MENTOR LAST YEAR (otherwise leave blank)

8. Who was your mentor for 2003-2004?

9. Would you like to stay with her or switch to someone new?

(There are many reasons that someone might want to switch so please don't worry about offending your 03-04 mentor if you choose to switch.)

Also please note that several of our mentors from last year have graduated so you may be reassigned to a continuing student.
