

SAP Upgrade Change Documentation

SAP Function	SU53 – Authorization Check	
Change Description	The first time a person opens this transaction after the upgrade, the SU53 window will present authorization data in an unfamiliar appearance. This format will not be useful for MIT authorization diagnostics. The user should click the Switch Layout button to view the authorization data in the 'old' layout. This 'old' layout should be used when taking screen shots to send in emails requested by SAP Support Once the user switches layouts back to the 'old' format, they won't have to do this step again. SAP will remember the display the person last used. A person who uses multiple SAP environments will need to switch displays in each environment.	
Step 1.	Open SU53 – Authorization Check. The new window looks like this: 	The new window shows authorization data in an Expandable/Collapsible format. This format is not useful
Step 2	Click the Switch Layout button to display the view the familiar layout. 	This is the layout which should be used when take screen shots required to diagnose an authorizations issue.
