You are invited to attend a presentation led by McKinsey & Company’s Operations Practice on **Wednesday, September 17 from 5:00-6:00 PM in Room 4-231** to talk about the opportunities in our Operations Practice.

McKinsey & Company is a leading international management consulting firm with 86 offices in 51 countries that advises top management of leading corporations, nonprofit institutions, and government agencies on issues of strategy, organization, and operations. While you may be unfamiliar with McKinsey's Operations Practice, operations engagements make up 25% of all McKinsey engagements and serve 76% of the global Fortune 100. The Operations Practice offers an exciting and unique career opportunity in consulting - developing the problem-solving and leadership skills for which McKinsey consultants and alumni are known for. We help clients improve processes that deliver value to customers while continuing to operate profitably and invest in the future. Our Operations Analysts and Associates play an active role in all operations-related aspects of a client engagement: identifying issues, forming hypotheses, designing and conducting analyses, synthesizing conclusions into recommendations, and helping to implement change. This also includes discussions with and presentations to senior client leaders. Operations consultants gain leading-edge operations and consulting skills primarily through on-the-job apprenticeship with other consultants while working on client projects. McKinsey is a place where you will enjoy unparalleled opportunities to develop your professional and personal skills in an environment that encourages striving for excellence and continuously improving. We currently have five Operations Analyst programs that are looking for interested graduate and undergraduate students:

1. **Production System Design Center (PSDC)** seeks engineering talent with experience in manufacturing, production, or an intensive asset improvement environment to share our vision and passion for lean operations through the design and implementation of lean production systems. (Orange County, California and Atlanta locations)

2. **Service Operations Design Center (SODC)** seeks candidates who have a strong interest in service-oriented operations and lean manufacturing. (Orange County, California and Atlanta locations)

3. **Operations Management Center (OMC)** seeks candidates who have an interest in supply chain and an understanding of the methodology and application of optimization, simulation, stochastic modeling, decision analysis, and forecasting. (Chicago location)

4. **Purchasing and Supply Management (PSM)** practice is seeking candidates with knowledge of purchasing and strategic sourcing principles such as: TCO, supplier collaboration, design to cost, risk management, price leverage, organizational design, global sourcing, etc. (Chicago location)

5. **Product Development (PD)** practice is seeking candidates with strong engineering backgrounds who have interest in product development work from a broad perspective focusing on design to cost and value. (Chicago location)

We would also like to invite PhD and Masters candidates to learn about Associate opportunities in the Operations Practice.

If you are interested, please join us from 5:00-6:00 PM on Wednesday, September 17 in 4-231 to learn more about these exciting opportunities and about McKinsey in general. You will also have the chance to talk to consultants about the Operations Practice and their experiences at McKinsey.

All interested candidates should apply directly at [www.mckinsey.com/careers](http://www.mckinsey.com/careers).
