

SEBC is proud to welcome Opera Solutions

Thinking about Management Consulting as a career?

We are excited to invite you to a short company presentation followed by an interactive case preparation workshop

Date: Tuesday October 28, 2008

Format:

Presentation includes an overview of Opera Solutions followed by a case interview workshop. This interactive workshop includes an overview of different types of cases, problem-solving strategies, and is followed by a group-based mock interview

Time & Location: 7-8:30PM, Room 4-237

Who's invited?

Students graduating between now through June 2009 who are interested in career opportunities in Management Consulting as a career opportunity, and preparing for case interviews. Undergrads, Masters and PhDs are invited.

RSVP: Please, RSVP to Frederic Chagnon (fchagnon@operasolutions.com) with your resume. RSVPs although not required are appreciated.

Questions: If you have any questions, please contact Frederic Chagnon at fchagnon@operasolutions.com.

Looking forward to seeing you there!

About Opera Solutions: Opera Solutions is a global management consulting firm offering rapid, significant and sustainable profit improvement to companies around the world. We deliver results through proprietary intellectual property and extraordinary intellectual talent that, together, unleash the power of clients' vast data reserves. Opera implements as well as advises, delivering tangible, measurable profit growth to clients. We are so confident in our abilities, we often work on a gain-share arrangement based on actual improvements. Our consultants can point to the specific, real impact they have made on clients' bottom lines - cumulatively, \$10 billion. We serve global Fortune 500 companies in a diverse range of industries, as well as mid-size operating companies owned by our Private Equity clients.

Founded in 2004, we now number 300+ professionals with offices in the Americas, Europe, and Asia. Our growth provides consultants with opportunities to take on new responsibilities early in their careers and master new challenges every day. Our firm is comprised of graduates from the world's leading engineering and business schools in North America, Europe, and Asia, as well as undergraduates with degrees ranging from Computer Science to History, from Economics to Literature, and beyond.
