

List of Tables

	Page
Table 1-1. <i>Characteristics of US demolitions explosives</i>	1-2
Table 1-2. <i>Characteristics of block demolition charges</i>	1-5
Table 1-3. <i>Characteristics of boreholes made by shaped charges</i>	1-10
Table 1-4. <i>Demolition equipment set</i>	1-22
Table 3-1. <i>Timber-cutting charge size</i>	3-8
Table 3-2. <i>Hasty steel-cutting chart for TNT</i>	3-10
Table 3-3. <i>Hasty steel-cutting charge for C4</i>	3-10
Table 3-4. <i>Material factor (K) for breaching charges</i>	3-16
Table 3-5. <i>Breaching charges for reinforced concrete</i>	3-18
Table 3-6. <i>Conversion factors for material other than reinforced concrete</i>	3-19
Table 3-7. <i>Breaching charge thickness</i>	3-20
Table 3-8. <i>Single-line ditching explosives data</i>	3-27
Table 3-9. <i>Cross-section ditching explosives data</i>	3-27
Table 3-10. <i>Boulder-blasting charges</i>	3-29
Table 3-11. <i>Gun-destruction charge sizes</i>	3-32
Table 4-1. <i>Minimum L_c values for arch and pinned-footing bridge attacks</i>	4-20
Table 6-1. <i>Safe distances for blasting near radio frequency energy</i>	6-5
Table 6-2. <i>Safe distances for personnel (near bare charges)</i>	6-6
Table 6-3. <i>Safe distances for personnel (charges on target)</i>	6-7
Table B-1. <i>Standard US demolition charges (metric equivalents)</i>	B-1
Table B-2. <i>TNT steel-cutting charges (metric)</i>	B-3
Table B-3. <i>Material factors (M) for breaching charges (metric)</i>	B-4
Table C-1. <i>Antitank (AT) mine explosives content (by nation)</i>	C-2
Table C-2. <i>General-purpose, aerial bombs (explosive contents)</i>	C-3
Table E-1. <i>Resistance in copper wire</i>	E-2
Table E-2. <i>Power source capacities</i>	E-4

	Page
Table G-1. Demolition materials	G-1
Table G-2. DODIC index for demolition materials	G-5
Table H-1. Minimum E_R values for bottom attack (percent)	H-1
Table H-2. Minimum L_C values for top attack (midspan)	H-2
Table H-3. Attacks on simply supported bridges	H-3
Table H-4. Attacks on continuous bridges	H-7
