What research and data collection strategies can be used to study globalization?

Julia Lane
NORC/University of Chicago

Date

NORC at the UNIVERSITY OF CHICAGO
*Innovative solutions in research and technology*

Tools have to fit question at hand

- Globalization characteristics
  - Fast paced => timely
  - Complex => rich
  - International => cross borders
- Scientific characteristics
  - Categorizable => identifiable "buckets"
  - Generalizable => representative
 - Replicable => accessible

What currently exists doesn't work

- Federal agencies
  - Different mandate
  - Confidentiality rules
  - Nationally bound
  - Preexisting buckets
- Academic research
 - Rarely generalizable and replicable
What might work?

Use VIAS to Crawl the Web and Capture Data

Convert Data to Knowledge Using D2K

Collaboratively analyze, reformulate queries and "re" search

Create Sample Frame and Design Research Queries and Metrics

What might work?

- Create national academic study of organisations
  - Create sample frame from GSS
  - Survey workers on globalization
  - Survey their employers on what they're actually doing
  - Match in with industry studies information
    - Videos
    - Texts
    - Websites
  - Initiate similar projects using ISSP

Dissemination

- Use data enclave

- Remote access to authorized users

- Use collaboratory approach to tag, index, archive and curate data

- "incentivize" collaboration through citations

To begin using your site, click **Create a Post** under Admin Links to the right.

What is a Blog?

A Blog is a site designed to help you share information. Blogs can be used as news sites, journals, diaries, team sites, and more. It is your place on the World Wide Web.

Blogs are typically displayed in reverse chronological order (newest entries first), and consist of frequent short postings. With this Blog, it is also possible for your site visitors to comment on your postings.

n tool. Keep team members in touch by providing a

Welcome to your wiki library!

You can get started and add content to this page by clicking **Edit** at the top of this page, or you can learn more about wiki libraries by clicking How To Use This Wiki Library.

What is a wiki library?

Wikiwiki means quick in Hawaiian. A wiki library is a document library in which users can easily edit any linking existing pages together or by creating links to new pages. If a user finds a link to an uncreated p create the page.

In business environments, a wiki library provides a low-maintenance way to record knowledge. Informa messages, gleaned from hallway conversations, or written on paper can instead be recorded in a wiki lik knowledge.

Other example uses of wiki libraries include brainstorming ideas, collaborating on designs, creating an i the field, tracking call center knowledge, and building an encyclopedia of knowledge.
