What are a couple of the facts you found most interesting?

What age group do you think the guide is best for (for example, 16-20 year olds)?

(over)

Do you think this kind of information would change others' consumption habits? What about your own?

What did you like best? Least?

To be effective, the guide should cover current problems and give possible improvements individuals can make. Did you find this kind of information? What topic weren't covered that you'd like to see?

Any other comments or suggestions on the guide? Tell us what you think about it...
