

About iCognitive

Founded in Singapore in 2002, **iCognitive** is a **consulting company** specialized in **Supply Chain Management and Research**. iCognitive is the leading authority in South and Southeast Asia on the Supply-Chain Operations Reference-model (**SCOR**) and its application to improve a company's supply chain with others.

iCognitive offers a proven capability to support companies of any size in their effort to use SCOR to improve their supply chain operations. Their consulting and corporate education expertise covers all aspects of the SCOR model and all phases of a SCOR implementation project.

iCognitive links the [Supply Chain Council](#) with industries operating in the region, as the sole provider to offer the SCOR benchmarking service in Asia and employing the sole Certified Master SCOR instructor of South East Asia by Supply Chain Council.

In addition, iCognitive has the expertise in rapid software development to support supply chain initiatives. Companies can engage iCognitive to develop custom-made supply chain software for areas not well served by major supply chain software vendors.

Four major services which iCognitive provides are:

1. Supply Chain Management (SCM) Consultancy Services
2. Corporate Education
3. Supply Chain Management (SCM) Benchmarking
4. SCM Software Development

Now, iCognitive has offices in Singapore, France, China, Malaysia and Middle East (soon).
